Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would be illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor at the Empire State building. One reason being a law against airships flying too low over urban areas. Architects went through many obstacles in building masts.

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, Chinas population has to.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

REWRITE

Also, the number one and two things that get most people in wrecks be texting and drinking. People don't have to worry about a driverless car finna text somebody back or be on the phone looking at social media.

Driverless cars, they don't get distracted. People also won't see a driverless car in a bar getting drunk. That just won't happen. Them driverless cars won't be pulled over for being intoxicated or swerving because they won't be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yeah, that's true, as of now. But people should be fine with having to take the wheel sometimes.

My last point would be that computers are a huge help for businesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they had to work around was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

REWRITE

No, I don't think that should happen—that would be stupid, and I reckon a lot of people will disagree with it. One reason is because adults, y'all know, like all of that stuff. And if they were doing this because kids keep getting into them, then just get a door that says @NUM1 and older and put cameras up. If kids' parents complain, then at least you can say that it's all in one room and no kids allowed. This shouldn't be a big deal—if you're a kid, you're gonna have to be around all of that stuff when you grow up, so you might as well get used to it. It is a big deal if you're cursing all the time, but most kids know better and know not to do bad stuff.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

REWRITE

There were a lot of obstacles that came up while folks were trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard, and well-thought-out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one-thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which put stress on the building's frame. The architects also had to build themselves a shiny glass and chrome-nickel stainless steel tower that would be illuminated from inside, with a stepped-back design that mimicked the overall shape of the building. Later on they reckoned dirigibles couldn't moor at the Empire State Building. One reason being a law against airships flying too low over urban areas. Architects went through many obstacles in building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Thirdly student will never learn nothing if they wast there time because computer is for studing and many students don't have there time wisely as they should also many student should be using comput only sometimes not everyday I have notice that so many students don't learn from compu for because they are not studing tests mre then @PERCENT1 student fail classes because of computer. First of people should be spending time with and friends because they are teh most important people aroun ud not computers. Are still with me? Secondly friends are the most important people I ever had because they care about and love you like you're ther families but what if you just wast youre on computer how are you know all your friends.

REWRITE

Third, students will never learn nothing if they waste their time because computers are for studying and many students don't use their time wisely like they should. Also, many students ought to be using computers only sometimes, not every day. I have noticed that so many students don't learn from computers because they are not studying right hard. More than @PERCENT1 students fail classes because of computers. First of all, people should be spending time with family and friends because they are the most important people around, not computers. Y'all still with me? Second, friends are the most important people I ever had because they care about and love you like you're their families, but what if you just waste your time on computers? How are you gonna know all your friends?

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there's still some uneasiness since it's not sure or confirmed that Venus was once like Earth. I reckon that's why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benefits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

There have been many weird things in space that we could never figure out. Some of those things are just normal stuff that happens in space and some people don't know that happens. It could've just been a normal thing that happen and everyone thinks it's a big piece of information of aliens. People make hypothesis way to quickly based off of what they've seen and heard. Not all things are true. No one has truly seen an alien before and if there were aliens shouldn't have people already have seen one? Earth has been around for a long time and nobody has seen and alien life form.

REWRITE

There's been a lot of weird things in space that we couldn't never figure out. Some of those things are just normal stuff that happens in space and some folks don't know that happens. It might could've just been a normal thing that occurred and everyone thinks it's a big piece of information about aliens. People make hypotheses way too quick based off of what they've seen and heard. Not all things are true. No one has truly seen an alien before and if there were aliens, shouldn't people have already seen one? Earth has been around a long time and nobody has seen an alien life form.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offend someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

In every paragraph in the memoir he explains how life was and how he loved it so much. In paragraph @NUM1 he uses parenthesis to show or talk about how much he loved different kinds of things. He shows in his writing all the warm kind of feelings he had as a child. In paragraphs three and four he also talks about how much he loved being with other cultures and how his parents were really good people.

REWRITE

In every paragraph of that memoir he explains how life was and how he loved it so much. In paragraph @NUM1 he's a-using parenthesis to show or talk about how much he loved different kinds of things. He shows in his writing all them warm kind of feelings he had as a child. In paragraphs three and four he also talks about how much he loved being with other cultures and how his parents were right good people.

ANCHOR

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus blooming are both symbolizing new life. Saeng is going to have an outlook on life and accept her situation to make the best of it. Also, the author says the winter hibiscus was in the ground now as it does compare to Saeng's new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

REWRITE

Many obstacles were a-coming up while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard, and thought-out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one-thousand-foot dirigible moored at the top of the building, and it was being held by a single cable tether, which added stress to the building's frame. The architects also had to build them a shiny glass and chrome-nickel stainless steel tower that would be illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor at the Empire State Building. One reason being a law against airships flying too low over urban areas. Architects went through many obstacles in a-building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

My next reason that you should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. Im very grateul that I had the opportunity to participate in this program. It relly opened up the world to me. I learned that people in other countries need help during times of war. My final reason that you should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three time a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable bit it kept me very busy during those long days at sea.

REWRITE

My next reason that y'all should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. I'm very grateful that I had the opportunity to participate in this program. It really done opened up the world to me. I learned that people in other countries need help during times of war. My final reason that y'all should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three times a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable but it kept me right busy during them long days at sea.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

REWRITE

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents don't happen very often to people, but it's also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also a-driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You'll have less risk of getting into an accident. Although the "non-driving driver" won't have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

Next time someone asks about driveless cars stop and think for awhile. Do you really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do you really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the government to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

REWRITE

No, I don't think that should happen. That would be wicked stupid, and I'm sure a lot of people will disagree with it. One reason is because adults like all of that stuff. And if they were doing this because kids keep getting into them, then just get a door that says @NUM1 and older and put cameras up. If kids' parents complain, then at least you can say that it's all in one room and no kids allowed. This shouldn't be a big deal—if you're a kid, you're going to have to be around all the time when you grow up. So you might as well get used to it. It is a big deal if you're cursing all the time, but most kids know better and know not to do bad stuff.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus budding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

ANCHOR

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

REWRITE

No, I don't think that should happen. That would be totally stupid, and I'm sure a lot of people will disagree with it for sure. One reason is because adults like all of that stuff. And if they were doing this because kids keep getting into them, then just get a door that says @NUM1 and older and put cameras up. If kids' parents complain, then at least you can say that it's all in one room and no kids allowed. This shouldn't be a big deal—if you're a kid, you're gonna have to be around all that stuff all the time when you grow up. So you might as well get used to it. It is a big deal if you're cursing all the time, but most kids know better and know not to do bad stuff.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is totally biased because presidential candidates or a party's central committee can choose the electors, which may cause them to vote in a way that goes against the majority vote. What's most concerning is the possibility of a tie in the electoral vote. In that case, the election would get thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus against the voters' popular vote, for sure. This makes the electoral college kind of irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, Chinas population has to.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

It could've just been a normal thing that happened and everyone thinks it's a big piece of information about aliens. People make hypothesis way too quickly based off what they've seen and heard, for sure. Not all things are true. No one has truly seen an alien before and if there were aliens, shouldn't people have already seen one? Earth has been around for a long time and nobody has seen an alien life form.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

I think that if u feel like they are sayin bad thing that you should not read the books or magazines and dont lisen to the music and dont look at the moves. If you feel offensive about it just dont look at it because a porson might not find it offensive.It is port of life to look at something offensive so why do it now. I think that if they do that they might just take some @CAPS1.Vs shows off the air becuas there are a lot off shows out there that are offensive and some do not like that but they dont take it off the air so why take books music, movies, and magazines off the shelves.

REWRITE

I think that if you feel like they are saying bad things, you guys should not read the books or magazines and don't listen to the music and don't look at the movies. If you feel offended by it, just don't look at it because a person might not find it offensive. It's part of life to look at something offensive, so why do it now? I think that if they do that, they might just take some @CAPS1 V shows off the air because there are a lot of shows out there that are offensive and some do not like that, but they don't take it off the air, so why take books, music, movies, and magazines off the shelves?

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

Next time someone asks about driveless cars stop and think for awhile. Do you really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do you really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the government to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.
