ANCHOR

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

REWRITE

Dear local Newspaper, I get that computers be having a bad effect on folks of all ages. In my opinion, being on the computer all day mean you gonna miss out on outdoor activities. And if you sit in a chair all day, for real, what's gonna happen to you? You finna be less active. From past experiences, I done learned that if you get into a computer game, it can get real addicting. Computers put negative effects on people of all ages, and I think we should stop and think about what we doing. Most likely, if you stay on the computer all day, you ain't gonna do things like sports.

ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon, the builders of the Empire State Building faced a problem with building a dock for dirigibles. One issue they faced was not having a suitable landing area. In paragraph six, it mentioned how dirigibles could only anchor there for a few hours. Plus, they realized most dirigibles from outside the U.S. used hydrogen instead of helium, which had been more flammable. In paragraph thirteen, it noted an accident could have been worse if it happened over a crowded area like downtown New York.

ANCHOR

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

REWRITE

No, I don't think that should happen 'cause that'd be messed up, and I'm sure a lotta people gon' disagree with it. One reason is because grown folks be likin' all that stuff. And if they doin' this 'cause kids keep gettin' into them, then just put a door that says @NUM1 and older and put cameras up. If kids' parents complain, then at least you can say it's all in one room and no kids allowed. This shouldn't be a big deal; if you're a kid, you gonna have to be around it all the time when you grow up. So you might as well get used to it. It is a big deal if you cussin' all the time, but most kids know better and know not to do wrong.

ANCHOR

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

REWRITE

I'd be against the development of these cars, just 'cause if you ain't got no control over the car, it might crash more than one a person be drivin', 'cause what happens if it's finna have a accident and you can't turn it away? I feel it'd be better if we folks was drivin' instead of some system in the vehicle controllin' it. We done had Google cars drivin' independently under certain conditions since 2009, and they can drive over a half a million miles without crashin', but that Google car still ain't truly driverless 'cause it still gotta alert the driver if something goes wrong.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college be real biased 'cause the presidential candidates or a party's central committee can choose them electors, and that might make them vote different from the majority. What's worrying is if there's a tie in the electoral vote; it would get thrown to the House of Representatives. There, state delegations vote on the president, and since each state only gets one vote, the representative from Wyoming got as much say as the 55 from California. Most states got a "winner-take-all" system, which could easily mess up the vote and go against the voters' popular vote. This makes the electoral college irrational. The electoral college be just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

ANCHOR

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

REWRITE

One reason I think the Electoral College be workin' is 'cause it set up where electors vote for the President and Vice President, then Congress count them votes. It help pick the president and vice president, and if we ain't have it, there'd be chaos 'cause the Electoral College make it easier, faster, and just a better way. It got them electors and votes, which matter a lot 'cause the 23rd Amendment say D.C. get 3 electors, treatin' it like a state in the Electoral College. That's why when they talk about states, it include D.C. too.

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

REWRITE

Driverless cars ain't really driverless and might even make more problems on the road. One bad thing is that the ability to drive a car gon' eventually wither away and die. Like, if you took a baby who was one and done cooked for and fed him till he was eighteen, would he know how to cook? Even if he watched you, he ain't gon' cook the way you do 'cause he ain't learn the skill. It wasn't needed. So just like that, manual driving could get wiped out for generations. Eventually, anybody gon' know how to drive? Driverless cars be about the future, but are they really better for us? Not necessarily. Even though, there's as many good things as bad ones.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

REWRITE

Automobiles be causing a lot of pollution on this planet. Passenger cars be responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in car-heavy areas in the United States. Greenhouse gas done started to wear down the Earth's ozone layer, and if it goes away, human life finna soon start to disappear too. So, it would be smart to limit car usage all over the world and in major industrialized areas to help stop the ozone's destruction. At the very least, we gotta slow it down so future generations have a stable environment to live in, instead of having to wear gas masks like some folks in Beijing, China.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason they give us is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author ain't even clear on how this matters to us now. What good is a planet that "may well once been the most Earth-like planet in our solar system?" That sentence got some uncertainty 'cause it ain't confirmed Venus was ever like Earth. So, that's why the author of "The Challenge of Exploring Venus" don't make studying Venus seem important. The lack of pros and benefits adds to them cons and uncertainty from this article.

ANCHOR

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

REWRITE

Computers done helped businesses a lot. When them files get lost, workers be using computers to pull up the back-up. And they be ordering supplies online, checking websites and all. When there's updates about upcoming events, folks send out emails through computers. Some people think we overuse computers, but that's on the user. We should choose how long we be on them computers. Many jobs would be impossible without computers. It ain't about overusing them, it's about using them right. So overall, computers are good and useful in the right hands.

The author concludes with this paragraph to show her determination. When she says, "when the snows melt and the geese return and his hibiscus is budding, then I will take that test again." Saeng is explaining how the geese have the determination to fly back and that the hibiscus has the determination to bud again so why shouldn't she have the determination and confidence to take the test again. Saeng said, "I-I failed the test." It seems as if failing the driving test made her feel like she was going to fail in the new country. But after she saw the geese's and hibiscus's determination through harsh conditions, she was determined to try the test again.

REWRITE

The author wraps up with this paragraph to show her determination. When she say, "...when the snows melt and the geese return and his hibiscus is budding, then I will take that test again." Saeng be explainin' how them geese got the determination to fly back and the hibiscus got the determination to bud, so why shouldn't she have the determination and confidence to take the test again. Saeng done said, "I-I failed the test." It seem like failing the driving test made her feel like she was gonna fail in the new country. But after she saw the geese and hibiscus bein' determined through harsh conditions, she was finna try the test again.

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offened someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

REWRITE

I'm thinking nah, 'cause you ain't tryna deal with that many folks over just a few books. I ain't saying people don't get mad about what books and movies do sometimes, but you finna have way more than one person show up saying there's more than just one book or movie. Then there wouldn't be no books left. What if somebody come in and they want a certain movie, and you say, "I'm sorry, we done took that movie off the shelf 'cause it upset somebody?" I got a feeling that person ain't finna be happy, and you gonna have some explaining to do.

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

REWRITE

No, I reckon that shouldn't happen—that'd be right foolish, and I'm sure a lot of folks would disagree. One reason is 'cause adults like all that stuff. If they're doin' this 'cause kids keep gettin' into 'em, then just get a door that says 18 and older and put cameras up. If kids' parents complain, then at least you can say it's all in one room and no kids allowed. This shouldn't be a big deal; if you're a kid, you're gonna have to be around it when you grow up, so you might as well get used to it. It's a big deal if you're cussin' all the time, but most kids know better and know not to do bad stuff.

I think that the passage is trying to say the sum because in the passage. it says in the spring when the snows melt and only the sun does that and the gees return hunting season and the hibiscus is budding then I will take that test again . so @CAPS1 start in the spring so it has to be the sun in the spring time.

REWRITE

I reckon the passage is tryin' to say the sum 'cause it mentions the spring. It talks 'bout "in the spring when the snows melt and only the sun does that and the gees return huntin' season and the hibiscus is a-buddin' then I will take that test again." So it starts in the spring, so it's gotta be the sun in springtime.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

REWRITE

I'm against the development of these cars, mainly 'cause if y'all have no control over the car, it might crash more likely than one a person is drivin'. What happens if it's fixin' to get in a wreck and you can't turn it to avoid that? I reckon it'd be better if folks took control of drivin' instead of some system put in the vehicle that does it. Sure, we've had Google cars drivin' independently under certain conditions since 2009, runnin' over a half a million miles without crashin', but the Google car ain't truly driverless since the driver still has to take over if something goes wrong.

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

REWRITE

The author wraps up the story the way they did to show just how much the plant really means. S'aeng's fixin' to wait till the flower blooms because it means so much to her. The flower stands for her and her driving test. When that hibiscus is ready to bloom, she'll be ready to drive. The plant gives her hope for a new tomorrow, a fresh chance. The last paragraph helps the reader see just how important the plant is to the girl, its significance. It makes her feel right at home, while her home feels strange; it brings her joy after the misery of failing the driving test.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is right biased because the presidential candidates or a party's central committee can choose the electors, which might cause them to vote against the majority. The most worryin' part is the prospect of a tie in the electoral vote. If that happens, the election goes to the House of Representatives, where state delegations vote on the president. Every state just gets one vote, so the single representative from Wyoming has as much say as the 55 representatives from California. Most states have a "winner-take-all" system, which could easily throw off the vote and swing it the wrong way, against the popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

REWRITE

A heap of obstacles were faced tryin' to get the Empire State Building to let dirigibles dock there. This was a long, hard-thought process. Folks couldn't just drop a moorin' mast on the roof. A thousand-foot dirigible got moored at the top of the building. It was held by a single cable tether, which added stress to the building's frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that was lit up from inside, with a stepped-back design that imitated the whole shape of the building. Later on, they realized dirigibles couldn't moor at the Empire State Building. One reason bein' a law against airships flyin' too low over urban areas. Architects done faced many obstacles with buildin' masts.

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

REWRITE

One reason I reckon the Electoral College works is 'cause its process involves choosin' electors who vote for President and Vice President, and Congress countin' the electoral votes. The Electoral College helps pick the president and vice president, and if we didn't have that, it'd be total chaos. It makes things right easier and faster, and it's a better process. The Electoral College has a bunch of electors and votes, which is real important 'cause under the 23rd Amendment, the District of Columbia gets 3 electors and is treated like a state for Electoral College purposes. For this reason, in discussions, "state" also refers to D.C.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

You can make time limts for yourself so that you don't spend your whole time on the computer. This way you can took to all of your loved ones would you want to be the one crushing the oceans of a child that wants to talk/ see his grandparents?

REWRITE

Lastly, the way computers are advancin' means y'all are stayin' connected with family and friends. Computers offer many sites like Facebook or MySpace to connect with loved ones. You can also hop on Zoom or Skype to chat or video chat with 'em. Sure, maybe computers are takin' away time with family, but what about friends or family in @LOCATION1 that y'all haven't seen in over a year? Don't you want some time with them too? You can set time limits for yourself so y'all don't spend your whole time on the computer. This way, you can talk to all of your loved ones. Would you want to be the one crushin' the hopes of a child who wants to talk with or see their grandparents?

My next reason that you should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. Im very grateul that I had the opportunity to participate in this program. It relly opened up the world to me. I learned that people in other countries need help during times of war. My final reason that you should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three time a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable bit it kept me very busy during those long days at sea.

REWRITE

My next reason why y'all should join the Seagoing Cowboys program is because it helps you be more aware of folks in other countries and what they need. I'm real grateful that I had the chance to join in this program. It done opened up the world to me. I learned that people in other places need help when there's a war going on. My final reason why you should join this program is because you'll learn the true meaning of hard work. I had to clean out animal stalls and feed and water all the animals two or three times a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It might sound miserable, but it sure kept me busy during those long days at sea.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

REWRITE

Automobiles are to blame for a whole lot of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to half in some car-intensive areas in the United States. Greenhouse gas is slowly eatin' away at Earth's ozone layer, and if the ozone layer were to disappear, human life itself might vanish soon after. So, it would probably be smart to limit car usage on every continent and in major industrialized areas to help stop the destruction of the ozone. Or at least slow it down so future generations have a stable environment to live in, rather than havin' to wear some sort of gas mask to breathe, just like Beijing, China's population has to.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason we're given is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system." The author doesn't even say how this matters to our society today. What do we gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone, there's still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, I reckon this is why the author of "The Challenge of Exploring Venus" doesn't back up the idea of studying Venus very clearly. The lack of pros and benefits to our planet just adds to the cons and uncertainty that comes from reading this article.

Venus is called the "Evening star"

is one of the brightest points of light in the night sky and it also our solar system venus is the second planet from our sun. While venus is simple to see from the distant but safe vantage point of earth. It has proved a very challenging place to examine more closely. It's important that if we study about venus because it help us to know about happed in the world and it help us to know where the sun come from without the sun we won't be able to live long, and it's important to know about the earth. The venus's reputation as a challenging planet for human to study despite its proximity.

REWRITE

Venus is called the "Evening Star," and it's one of the brightest points of light y'all can see in the night sky. Venus is the second planet from our sun in our solar system. While it's easy to spot from Earth's distant but safe point of view, it's right hard to study up close. It's important to study Venus because it helps us understand what happened in the world and where the sun comes from. Without the sun, we wouldn't be able to live long, and it's important to know about Earth. Venus has a reputation as a challenging planet for folks to study, even though it's close by.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

REWRITE

My last point would be that computers sure are a big help for businesses. When files get lost or misplaced, the workers can use the computer to bring up the back-up file. When they need to order supplies, most times they'll hop on a website and order online. Or when updates are posted about upcoming events in that company, an e-mail is sent out and found using a computer. Many reckon folks overuse their computers, but that's the user's fault, not ours. We should choose how long we're a-using our computers. Without them, many jobs would be impossible. It ain't about overusing them, it's about how they're used. So, overall, I say computers are right useful when they're in the right hands.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

REWRITE

@CAPS1 and I done walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably shouldn't be repeated, but it made me laugh so hard I had trouble breathing. His timing was right perfect, and it made my mood soar. I always reckon I can turn to my friends when I feel down. They've always been there, proving I can count on them. That day started as a disaster, but the rest of the night was way better than I'd hoped. It's not just that my friends can lift my mood, but also that they make me laugh.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

REWRITE

I'm against the development of these cars, just 'cause if you ain't got no control over the car, it could crash more likely than if a person was a-driving it. What if the car's fixin' to have an accident and you ain't able to turn it so it won't? I reckon it'd be better if us people took control of the driving, not some system in the vehicle that does it. We done had Google cars driving on their own under certain conditions since 2009, going more than half a million miles without crashing. But at the same time, the Google car ain't truly driverless 'cause it still has to let the driver know to take over if something goes wrong.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is right biased because the presidential candidates or a party's central committee can pick the electors, which might cause 'em to vote not according to the majority vote. The biggest worry is a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Each state only gets one vote, so the single representative from Wyoming would have as much say as the 55 representatives from California. Most states got a "winner-take-all" system that could easily throw off the vote and swing it the wrong way, against the voters' popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

REWRITE

There were right many obstacles when tryin' to get the Empire State Building to allow dirigibles to dock. This was a long, hard process that folks thought out. They couldn't just put a mooring mast on top of the roof. A one thousand-foot dirigible was moored at the top with just a single cable tether, which added stress to the building's frame. The architects had to build a shiny glass and chrome-nickel stainless steel tower illuminated from inside, with a stepped-back design that imitated the building's shape. Later, they done realized dirigibles couldn't moor at the Empire State Building. One reason was a law against airships flying too low over urban areas. Them architects went through right much trouble buildin' masts.

ANCHOR

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

REWRITE

One of the reasons I reckon the Electoral College really works is because the process involves pickin' the electors who vote for President and Vice President, and then Congress counts them electoral votes. The Electoral College helps choose the president and vice president, and if we didn't have that, it'd be total chaos. With the Electoral College, it's right easier and faster and a better process. The Electoral College has many electors and electoral votes, and this is mighty important because, under the 23rd Amendment of the Constitution, the District of Columbia gets 3 electors and is treated like a state for Electoral College purposes. For this reason, when folks discuss it, the word state includes the District of Columbia.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

REWRITE

Driverless cars ain't really driverless and might even stir up more problems on the road. One bad part is that eventually the skill of driving could wither away and die. For instance, if you took a one-year-old baby and cooked for 'em until they was eighteen, would they be able to cook? Even if they watched you, they can never cook like you 'cause they wasn't ever taught. It wasn't needed. So just like that, manual driving could be wiped out for generations on down the line. Eventually, would nary a person know how to drive? Driverless cars are a thing of the future, but are they truly better for us? Not necessarily. Though, there's just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, Chinas population has to.

REWRITE

Automobiles are to blame for a right much of pollution on this here planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-heavy places in the United States. Greenhouse gas is a-takin' away at Earth's ozone layer and if it went away, human life itself will soon start to go away. So it might be smart to limit car usage across every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at least slow it down so generations to come have a stable environment to live in, rather than wearin' some sort of gas mask or filter over their face to breathe, like the folks in Beijing, China have to.

Kids need to understand what books are good for them from there age and otherwise their brain will start confusing them at their age.The conclusion is that libraries need to make something up so children don't read these kind of books that the only thing will do is mess up with there brain and then there parents will need to pay so their children could take therapy and others kids so their brain could be better. So please libraries do something so parents don't need to worry about what there kids read these days. Like for me I won't like my kid read offensive things because they will start doin the same things so libraries do something about these on offensive things.

REWRITE

Libraries need to help kids figure out which books are good for their age; otherwise, it'll just get their brains all confused. The conclusion is that libraries gotta do something so young'uns don't end up reading stuff that'll mess with their minds, and then their parents don't have to worry 'bout paying for therapy so their kids' brains can get right again. Like, I wouldn't want my kid a-readin' offensive things 'cause they might start doin' the same, so libraries need to take care of them offensive books.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

REWRITE

Each of the past missions were unmanned, and that was for a good reason, since no spacecraft could survive more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent. What's even more challenging is the clouds that contain highly corrosive sulfuric acid, which are also in the atmosphere. The temperature alone would kill a person right on contact. It's 800 degrees Fahrenheit, and the atmospheric pressure is 90 times greater than what we've ever felt on our planet. So even though Venus is a right cool planet, it can be a dangerous one too 'cause of the misleading name, the planet being seen as Earth's twin, and for the atmosphere being so different than ours here on Earth.

I think the mood that is created by the author in this memoir is cheerful and welcoming. In paragraph @NUM1 he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone that ever needed, all wanted to come, which is a very welcoming feeling. In paragraph @NUM2 he says, "I will always be grateful to my parents for their love and sacrifice." The movie is creating when he is saying this is very cheerful because he is very happy and grateful for what his parents did for him, and by him showing that it makes the mood cheerful.

REWRITE

I reckon the mood the author creates in this memoir is right cheerful and welcoming. In paragraph @NUM1 he talks about, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author's a-talking about how their house was a place you'uns could always come to if needed, which is real welcoming. In paragraph @NUM2, he's saying, "I will always be grateful to my parents for their love and sacrifice." This idea makes the mood right cheerful because he's feeling happy and thankful for his parents and by showing that, the mood turns cheerier.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason we're given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author don't even make it clear how this matters to society today. What's there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there's still right much uneasiness 'cause it ain't sure or confirmed that Venus was once like Earth. So, this is why the author of "The Challenge of Exploring Venus" don't make a good case for studying Venus. The lack of pros and benefits to our planet just adds to the pile of cons and uncertainty from reading this article.

Studying Venus isnt worthy puting peoples life in danger and taking dangers. There is many reasomns why studying Venus is such a good idea. Reason nyumber one is that it is to dangerous for humans or anything to be going up to Venus. Reason number two is that they have all te equiment but are they ready do be risking a lot of things. First, studying Venus can be so greatful and amzing but they would be puttin a lot of things in danger just to study Venus. Venus for humans is very dangers. Like the author said in paragrag three, " Venus has the hottest surface temerature of any planet in our soloar system." Despite the fact that Mercury is closer to te sun than Venus is. "

REWRITE

Studying Venus ain't worth putting people's lives in danger and taking risks. There are many reasons why studying Venus is such a good idea. The first reason is that it's too dangerous for humans or anything to be going up to Venus. The second reason is that they have all the equipment, but are they ready to be risking right much? First off, studying Venus can be right amazing, but they'd be putting a lot of things in danger just to study it. Venus for humans is very dangerous. Like the author said in paragraph three, "Venus has the hottest surface temperature of any planet in our solar system," despite the fact that Mercury is closer to the sun than Venus is.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

REWRITE

If someone's riding in the driverless car and it crashes, the manufacturers should be to blame unless they've done developed a way for the humans to take complete control when needed. Many could argue that the manufacturer didn't program the car right and that's why the person was injured or even killed. This might result in them big companies paying millions, maybe billions, in law suits. In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

REWRITE

In the memoir "Narciso Rodriguez", the mood the author done created was loving, caring, and appreciative. Loving is what they did most 'cause they called everybody their family, pretty much. For instance, in paragraph @NUM1 it says, "My parents always kept their arms and their door open to the many people we call family, knowing that they would do the same for us." Another mood was caring 'cause they wanted their young'uns to have a better life. An example is "My mother and father had to come to this country with such courage, to give their children a better life, leaving their friends, families, and career in the country they loved." This shows they care about their kids. One last mood is appreciative.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

REWRITE

Computers are right helpful for businesses. When files go missin', workers can use the computer to bring up the back-up file. When they need to order supplies, they usually go online. Or when updates about company events are posted, an email gets sent out and is found on the computer. Some folks think people overuse their computers, but that's the user's fault, not ours. We should decide how long we're gonna be on them computers. Many jobs would be impossible without 'em. It's not about overusing 'em, it's about how they're used. So overall, I say computers are good and very useful in the right hands.

Next time someone asks about driveless cars stop and think for awhile. Do you really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do you really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the government to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.

REWRITE

Next time y'all get to talkin' 'bout driveless cars, stop and think a bit. Do y'all really wanna change the country so you'uns don't gotta drive? Course folks would, but ya gotta look at all the cons. Do y'all really want to risk the safety of others or change laws you've been used to all these years? Do people really want the government to put all that money into this idea just so they can say it ain't completely driveless? After all, that's what everybody wants, a driveless car.

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon, the builders of the Empire State Building hit a snag in constructing a dock for dirigibles. One issue they ran into was not having a suitable landing area. In paragraph six, it mentioned that dirigibles could only anchor there for a few hours. Also, they realized most dirigibles from outside the country used hydrogen instead of helium, which was more flammable. In paragraph thirteen, they said an accident might've been worse if it happened above a crowded area like downtown New York, right?

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is pretty biased because presidential candidates or a party's central committee can pick the electors, which might lead them to vote against the majority's choice. The most troubling thing is if there's a tie in the electoral vote. In that case, the election heads over to the House of Representatives, where state delegations vote on the president. Since each state only gets one vote, the lone representative from Wyoming would have just as much say as the 55 representatives from California. Most states have a "winner-take-all" system, which could easily mess up the vote and make it swing the wrong way, against the voters' popular choice. This makes the electoral college irrational. Lastly, the electoral college is just unfair, right?

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

REWRITE

Ope, there were quite a few obstacles when they tried to get the Empire State Building to allow dirigibles to dock. This was a long, hard, and well-thought-out process. Workers couldn't just drop a mooring mast on the building's roof. A one-thousand-foot dirigible was moored at the top, held by a single cable tether, which added stress to the building's frame. The architects also had to build a shiny tower of glass and chrome-nickel stainless steel that would be illuminated from inside, with a stepped-back design that imitated the building's overall shape. Later, they realized dirigibles couldn't moor at the Empire State Building because of a law against airships flying too low over urban areas. Architects faced many obstacles in building masts, right?

In the excerpt "The Mooring Mast" by @ORGANIZATION2, the builders of the Empire State Building faced some obstacles in attempting to allow dirigibles to dock there. Although this sounded like a great idea and seemed possible at first, it was not. The idea of the mooring mast of the @CAPS1 State Building was neither practical nor safe. In paragraph fourteen, Marcia states why this dirigible idea wasn't so safe. "The winds on top of the building were constantly shifting due to violent air currents. In the last sentence of paragraph fourteen, the author states another reason the idea wasn't safe nor practical. "they would be dangling high above pedestrians on the street,"

REWRITE

In the excerpt "The Mooring Mast" by @ORGANIZATION2, the builders of the Empire State Building faced some obstacles when trying to let dirigibles dock there. Ope, even though this sounded like a great idea at first, it really wasn't. The plan for the mooring mast of the @CAPS1 State Building turned out to be neither practical nor safe. In paragraph fourteen, Marcia mentions why this dirigible idea wasn't so safe. "The winds on top of the building were constantly shifting due to violent air currents." In the last sentence of paragraph fourteen, the author gives another reason why the idea wasn't safe or practical, saying "they would be dangling high above pedestrians on the street," right?

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

REWRITE

Driverless cars aren't really driverless and could even cause more issues on the road. One negative aspect is that the ability to drive a car might just wither away and die. For instance, if you took a one-year-old baby and did all the cooking for him until he turned eighteen, would he be able to cook? Even if he watched you cook, he wouldn't cook like you because he never learned the skill. It wasn't needed. So, like that, manual driving could vanish for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as bad, right?

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

REWRITE

Automobiles are responsible for a lot of pollution on this planet. Passenger cars contribute to twelve percent of greenhouse gas emissions in Europe and up to fifty percent in certain car-heavy areas of the United States. This greenhouse gas is slowly wearing away at Earth's ozone layer and if the ozone layer disappears, human life itself may start to disappear as well. So, it'd probably be smart to limit car usage on every continent and in major industrialized areas to help stop the destruction of the ozone. Or at the very least, slow it down so future generations have a stable environment to live in, rather than needing to wear some sort of gas mask to breathe—kind of like folks in Beijing, China, right?

The bill on a computer goes up after a while and people don't realize that when they're paying for the internet, they aren't getting a lot of what the cable company says they're giving you. Not everyone knows how to use a computer, like older adults who don't really know how to use the full potential of a computer because they never learned. In this way, computers aren't a huge help for our society, 'cause of the time, the cost, and the knowledge needed on computers.

But it shouldn't get to the point where people can just remove books from the shelf at their own free will. Without some limit on censorship in a library, absolutely anything could be found there. When we think of a library we don't think of things that are offensive. People view the library as a positive place, created for people's own personal enjoyment. That doesn't mean that we will never find something that @DATE2 offend us in some way there, but people should not be able to just remove books from the shelf because they don't agree with their morals. @CAPS2 is different, and nobody has the right to tell them what exactly is right or wrong, up to a certain point.

REWRITE

People shouldn't be able to just take books off the shelf whenever they feel like it, right? Without some cap on censorship in a library, you guys could find absolutely anything there. When we think of a library, we don't picture offensive stuff. Folks see the library as a positive space, meant for personal enjoyment. Sure, there might be things that offend us sometimes, but people shouldn't just remove books they don't agree with morally. Everyone's got different views, and no one has the right to decide what's right or wrong for someone else.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

REWRITE

Also, the top two reasons people end up in wrecks are texting and drinking. You don't have to worry about a driverless car texting or checking social media, since driverless cars don't get distracted. And for sure, you won't see a driverless car hitting up a bar and getting drunk. It's just not going to happen. They won't be pulled over for being intoxicated or swerving, since they won't get intoxicated and will drive safely.

Now, some folks are going to say, "These aren't really driverless cars, you still have to drive them." And maybe that's true for now. But people should be okay with having to take the wheel sometimes, right?

ANCHOR

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

REWRITE

Computers are sure a big help for businesses. When files go missing, workers can just use the computer to pull up a backup file. When it's time to order supplies, folks often go to a website and order online. If there are updates on upcoming events in the company, an email can be sent out, which you find using a computer. Some people think that computers get overused, but that's the user's fault, not ours. We should decide how much time we're spending on computers. Many jobs would be impossible without them. It's not about overusing; it's about how you use them, right? So overall, I'd say computers are really good and very useful in the right hands.

The author concludes with this paragraph to show her determination. When she says, "when the snows melt and the geese return and his hibiscus is budding, then I will take that test again." Saeng is explaining how the geese have the determination to fly back and that the hibiscus has the determination to bud again so why shouldn't she have the determination and confidence to take the test again. Saeng said, "I-I failed the test." It seems as if failing the driving test made her feel like she was going to fail in the new country. But after she saw the geese's and hibiscus's determination through harsh conditions, she was determined to try the test again.

REWRITE

The author wraps up with this paragraph to show her resolve. When she says, "...when the snows melt and the geese return and his hibiscus is budding, then I will take that test again." Saeng is explaining how the geese have the grit to fly back and how the hibiscus has the drive to bud again, so why shouldn't she have the determination and confidence to take the test again. Saeng mentioned, "I-I failed the test." It feels like failing the driving test made her worry that she'd fail in the new country. But after she noticed the geese's and hibiscus's grit through harsh conditions, she was set on trying the test again. Right?

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

REWRITE

The setting took a big toll on the cyclist. He didn't have any water and was riding through the high deserts of California in June. The heat and lack of water were potentially life-threatening, leaving him stressed and thirsty. Combine that with biking, and you've got a dehydrated person in the desert! Between the ghost town and bait shop, he mentions, "There was no one in sight, not a building, car, or structure of any kind." This could lead him to feel there's no hope for survival if he passes out. Ope, the deserts of California really take a toll on any cyclist, especially one without water like this one.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offended someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon, the builders of the Empire State Building faced a wicked tough obstacle when trying to build a dock for dirigibles. One problem was they didn't have a suitable landing area. In paragraph six, it mentioned that dirigibles could only anchor there for a few hours. Also, they realized that most dirigibles from outside the U.S. used hydrogen instead of helium, which was more flammable. In paragraph thirteen, it was noted that an accident could've been worse if it had happened above a densely populated area like downtown New York.

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

REWRITE

No, I don't think that should happen. It would be wicked stupid, and I'm sure a lot of people would disagree. One reason is because adults enjoy all that stuff. If they're doing this because kids keep getting into it, just get a door that says 21 and older and put cameras up. If parents complain, you can say it's all in one room and no kids are allowed. This shouldn't be a big deal. As a kid, you'll have to be around these things when you grow up, so you might as well get used to it. It's a big deal if you're cursing all the time, but most kids know better and know not to do bad stuff.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

REWRITE

I'm wicked against the development of these cars, just because if you have no control over the car, it could crash more easily than one a person is driving. What if a car's about to get into an accident and you can't turn it to avoid crashing? I think it'd be better if people controlled driving, not some system put in the vehicle. We might have had Google cars driving on their own under specific conditions since 2009, where they've gone over half a million miles without crashing, but the Google car is truly driverless only when it alerts the driver to take over if something goes wrong.

ANCHOR

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

REWRITE

The author wraps up the story the way they do to show just how much the plant means to S'aeng. She's going to wait until the flower blooms, as it's wicked important to her. The flower symbolizes her situation with the driving test; once the hibiscus blooms, she'll be ready to drive. The plant gives her hope for a new day, a fresh chance. That last paragraph really helps you realize how significant the plant is to her, making her feel at home. Her home feels strange, but it also brings her joy and happiness after the tough experience of failing the driving test.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is wicked biased because the presidential candidates or a party's central committee can choose the electors, which might cause them to vote against the majority vote. The most worrying part is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Since each state gets just one vote, the single representative from Wyoming would have the same power as the 55 representatives from California. Most states have a "winner-take-all" system that could easily disrupt the vote and make it swing the wrong way, against the popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

REWRITE

Driverless cars aren't truly driverless and might even create wicked more problems on the road. One negative is, eventually the ability to drive could wither away and die. For instance, if you had a one year old baby and cooked for and fed them until they were eighteen, would they know how to cook? Even if they watched you, they can never cook the way you do because they never learned the skill. It wasn't needed. So, just like that, manual driving might disappear for generations. My next reason that you should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. Im very grateul that I had the opportunity to participate in this program. It relly opened up the world to me. I learned that people in other countries need help during times of war. My final reason that you should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three time a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable bit it kept me very busy during those long days at sea.

REWRITE

I'm wicked grateful that I had the chance to join the Seagoing Cowboys program. It makes you more aware of the needs people have in other countries, especially during wartime. The program opened up the world to me. My final reason for joining is that you'll learn the real meaning of hard work. I had to clean animal stalls and feed and water them a couple of times a day. I also had to pull up bales of hay and bags of oats from down cellar on the ship. It might sound tough, but it kept me busy during those long days at sea.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, Chinas population has to.

REWRITE

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

REWRITE

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

REWRITE

Also, the top two reasons people end up in crashes are texting and drinking. People don't have to worry about a driverless car sending texts or looking at social media on the phone. Driverless cars aren't distracted. You won't see a driverless car at a bar getting drunk. It's just not happening. The driverless cars won't be pulled over for driving intoxicated or swerving, since they're not intoxicated and will drive safely. My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

REWRITE

Computers are wicked helpful for businesses. When files get lost, workers can use the computer to find the back-up file. Ordering supplies usually happens online, and updates about events often come through e-mails on the computer. Some folks think computers get overused, but that's on the user, not youse or me. We should decide how long we're on computers. Many jobs would be impossible without them. Overall, I'd say computers are good and very useful when handled right.

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

REWRITE

While you're in the car, you always want to be sure you get to your destination without any issues. Car accidents might not happen all the time, but they're not exactly wicked rare either. The driverless car features will ensure safety while driving. Many people still text and drive, which is a big concern for you and other drivers too. With a driverless car, you can do what you need, like sending a text, and you'll be less likely to get into an accident. Even though the "non-driving driver" won't have to keep their hands on the wheel since the car does everything, the driver still needs to stay focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

REWRITE

I'm against the development of these cars because if you can't control the car, it could totally crash more than if a person was driving. Like, what if it's about to get in an accident and you can't turn it to avoid the crash? I feel it's better if people take control of driving instead of some system in the vehicle controlling it. We have had Google cars driving by themselves under certain conditions since 2009, and they can go over half a million miles without crashing, but the Google car isn't truly driverless because it still has to alert the driver to take over if something goes wrong.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is really biased because presidential candidates or a party's central committee can choose the electors, which might make them vote in a way that doesn't match the majority vote. The most concerning thing is the chance of a tie in the electoral vote. In that case, the election goes to the House of Representatives, where state delegations vote on the president. Since each state only gets one vote, the one representative from Wyoming would totally have as much say as the 55 reps from California. Most states use a "winner-take-all" system, which could easily mess up the vote and swing it in the wrong direction, going against the voters' popular vote. This makes the electoral college kinda irrational. In the end, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

REWRITE

many obstacles came up while trying to get the Empire State Building to allow dirigibles to dock there. This was, like, a long and tough process. Workers couldn't just drop a mooring mast on top of the building's roof. A one-thousand-foot dirigible was moored at the top, held by a single cable tether, which put stress on the building's frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that was illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on, they realized dirigibles couldn't moor at the Empire State Building, for sure. One reason was a law against airships flying too low over urban areas. Architects dealt with hella obstacles while building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

REWRITE

Automobiles are responsible for a significant amount of pollution on this planet. Passenger cars contribute to twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-heavy areas in the United States. Greenhouse gases are slowly wearing down Earth's ozone layer, and if the ozone layer goes away, human life is gonna start fading too. So, it would totally make sense to limit car use across all continents and major industrial regions to help slow the destruction of the ozone. This way, future generations can have a stable environment to live in, instead of needing to wear something over their faces to breathe, like some people in Beijing, China have to do.

Kids need to understand what books are good for them from there age and otherwise their brain will start confusing them at their age.The conclusion is that libraries need to make something up so children don't read these kind of books that the only thing will do is mess up with there brain and then there parents will need to pay so their children could take therapy and others kids so their brain could be better. So please libraries do something so parents don't need to worry about what there kids read these days. Like for me I won't like my kid read offensive things because they will start doin the same things so libraries do something about these on offensive things.

REWRITE

Libraries need to help kids figure out which books are right for their age, otherwise their brains could get hella confused. The takeaway is that libraries totally need to step up so children aren't reading stuff that just messes with their heads, causing their parents to have to pay for therapy or other services. It's important for libraries to take action so parents don't have to stress about what their kids are reading these days. Personally, I wouldn't want my kid reading offensive material because it might lead them to mimic those behaviors. Libraries, please do something about these offensive books.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

REWRITE

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide—like, almost 97 percent of it is carbon dioxide. What’s even more challenging is the clouds that contain highly corrosive sulfuric acid, which are also in the atmosphere. The temperature alone would kill a person right on contact. The temperature is 800 degrees Fahrenheit, and the atmospheric pressure is 90 times greater than what we've ever experienced on our planet. So, even though Venus is a pretty cool planet, it can be a dangerous one too because of the misleading name, the planet being considered Earth's twin, and the atmosphere being hella different than ours here on Earth.

I think the mood that is created by the author in this memoir is cheerful and welcoming. In paragraph @NUM1 he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone that ever needed, all wanted to come, which is a very welcoming feeling. In paragraph @NUM2 he says, "I will always be grateful to my parents for their love and sacrifice." The movie is creating when he is saying this is very cheerful because he is very happy and grateful for what his parents did for him, and by him showing that it makes the mood cheerful.

REWRITE

I feel like the mood the author creates in this memoir is cheerful and welcoming. In paragraph @NUM1, he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone who needed or wanted to come, which gives off a really welcoming vibe. In paragraph @NUM2 he mentions, "I will always be grateful to my parents for their love and sacrifice." The mood created when he says this is super cheerful because he's so happy and grateful for what his parents did for him, and sharing that makes the mood cheerful for sure.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

REWRITE

If someone is riding in a driverless car and it crashes, the manufacturers should be the ones to blame unless they come up with technology that lets people totally take control when needed. There are lots of arguments that the manufacturer didn't program the car right, leading to a person getting hurt or even killed. This could mean big companies have to pay millions, maybe even billions, in lawsuits. Driverless cars might cause more accidents since there isn't a person watching the car's surroundings, and technology as simple as calculators can malfunction sometimes. So, would you really trust a car run by a computer with your life?

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basically called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

REWRITE

In the memoir "Narciso Rodriguez," the mood created by the author was loving, caring, and appreciative. They hecka focused on loving since they basically called everyone their family. For example, in paragraph @NUM1, it says, "My parents always kept their arms and their door open to the many people we call family, knowing that they would do the same for us." Another mood was caring because they wanted their children to have a better life. An example is, "My mother and father had to come to this country with such courage, to give their children a better life, leaving their friends, families, and career in the country they loved." This shows they care about their kids. One last mood is appreciative.

ANCHOR

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

REWRITE

The top reasons people get into wrecks are totally texting and drinking. You guys won't need to worry about a driverless car texting back or checking social media. Driverless cars don't get distracted. Also, you aren't gonna see a driverless car at a bar getting drunk. It just won't happen. They won't be pulled over for being intoxicated or swerving since they're always gonna drive safely. Now, some people might argue, "These aren't really driverless cars, you still have to drive them." That's true for now. But people should be fine with taking the wheel sometimes.

ANCHOR

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

REWRITE

Computers are hella helpful for businesses. When files get lost or misplaced, workers can use computers to pull up a backup file. When they need to order supplies, they usually go to a website and order online. Also, when updates about upcoming events in a company are posted, an email is sent and found using a computer. Some people think folks overuse their computers, but that's the user's fault, not ours. We should choose how long we're on computers. Many jobs would be impossible without them. It's not about overusing; it's about using them right. Overall, I'd say computers are for sure good and useful in the right hands.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offended someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

REWRITE

I'm guessing no, 'cause you're not gonna wanna deal with all those people about just a few books. Sure, people do get offended by some stuff in books and movies, but you're gonna have way more than just one person saying there's more than one book or movie like that. So, then, there'd be no books left. What if someone comes in and asks for a specific movie, and you have to say, 'I'm sorry, we had to take that movie off the shelf since it offended someone.' I bet that person's not gonna be happy, and you'll have some explaining to do.
