ANCHOR

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

REWRITE

I was being patient when I was waiting for my own phone so I can text my friends and call them and more. I was also waiting to get my own snowmobile license so I can ride my own snowmobile on the trails. No matter what you are always be patient.

APPLIED FEATURES

no features applied

Notes: The anchor contains several orthographic errors and grammatical irregularities in the original ('patient', 'cam', 'snowmobile', 'licens', 'snowmible', 'troils', 'Know matter', malformed 'you are always be'). No allowed AAE feature is licensed by this anchor's semantic content. The output returns the anchor cleaned of orthographic errors but otherwise unchanged. The final clause 'you are always be patient' remains grammatically ambiguous in the original; no dialect feature resolves this ambiguity without introducing meaning change.

The book still will be censored to be in that section or not, but we still will have those wonderful books that we all love so much. What if there was a great informative book about how to do a certain task and no one knew how to do it. That book contained bad language, should the health and knowledge of the world go down because of some bad material in a book, that could help us in the near future. Authors have just the same right as we do. They should get a say in wheather @CAPS5 own book is liable to be on the shelves. The government should not get all the say in this series matter in hand. The community and the author that writes it should get more of the say then anyone else.

ANCHOR

People are spending too much time on their computers and are spending less time exercising, enjoying nature, and interacting with family and friends. These people are spending hours and hours in front of a computer getting heavier every day. They start to eat their feelings because of how lonely they are. This process continues until the certain person can barely yet out of their chair. Obesity is not the only problem that is damaging their health, their eyes are being damaged also. It is obvious that more & more people are having problems with @CAPS2 eyes everyday. Computers are making this happen. When a certain person is on the computer for only an hour, they are damaging their eyes tremendously.

ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

No i dont think that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

APPLIED FEATURES

aae_tryna: 'is trying to' → 'tryna'

Notes: The anchor contains 'is trying to', which licenses aae_tryna (allowed_for_generation: true). All other features lack the semantic ground required by their blocked_context. The passage is a complex argumentative/reasoning statement in what appears to be a student essay or exam response; preserving clarity and academic tone is essential. Tryna is applied as a straightforward lexical substitution without changing meaning or register.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

APPLIED FEATURES

no features applied

Notes: This anchor is an academic literary analysis with complex punctuation and carefully constructed reasoning. No allowed feature is licensed by the semantic content. The prospective 'is going to' does not cleanly map to finna (which marks immediate prospect rather than planned future). The stative and characterizing predicates do not license habitual be or perfective done. The dense subordination and rhetorical purpose (explaining textual meaning) argue against topic chaining, which would reduce clarity. The response remains unchanged.

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

The builders had many obstacles while building the Empire State building. They had competition with the Chrysler building because of it's height. Al Smith, the constructor of the Empire State wanted to build the tallest and most famous building in the world. He made the buildings seem invincible. He even put a mooring mast on it so things could land on it. But it was never supposed to serve that purpose, It was only created for publicity. Because about the mooring mast the building would have failed to become popular. Al Smith did everything to make that building what it is today and it is still standing in New York city today.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

The mood created by the author in the memoir is nice, and calm. It describes How the famialy let people in their house with open arms and a open door and that makes me and mybe other people seem the mood is nice. The mood is calm because it talks about this famialy doing nice thing and there is no yelling no fighting and I find the to be nice, and calm.

REWRITE

The mood created by the author in the memoir is nice, and calm. It describes How the family let people in their house with open arms and a open door and that makes me and maybe other people seem the mood is nice. The mood is calm because it talks about this family doing nice thing and there is no yelling no fighting and I find the to be nice, and calm.

APPLIED FEATURES

no features applied

Notes: This anchor is primarily descriptive and stative in character. It discusses the author's creation and perception of mood, the family's welcoming behavior, and the reasons mood is calm—none of which express habitual iteration, completion, near-future intent, reflexivity, or the other licensing conditions in the allowed inventory. The anchor also contains spelling errors ('describs', 'famialy'/'family', 'mybe'/'maybe', 'thing' should likely be 'things'), but these are editorial issues and not dialect features; they are not corrected here as the task is dialect rewriting, not proofreading. No allowed AAE feature is licensed by this anchor's semantic and grammatical structure.

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

Notes: This is a literary analysis passage in formal academic register. No allowed feature is licensed by the anchor's semantic and grammatical structure. The anchor is entirely stative, descriptive, or expressive of intention—not habitual action, completion, near-future, reflexives, or demonstratives. The anchor is returned unchanged. (Note: The anchor also contains a spelling error—'greatful' → 'grateful'—but this is a standard proofreading correction, not a dialect feature.)

APPLIED FEATURES

no features applied

Notes: This anchor is an argumentative essay excerpt in Standard English expressing a policy position on book removal from libraries. It contains no semantic conditions that license any of the allowed AAE features. The text is formal and prescriptive in tone; no habitual actions, completions, near-future intents, reflexives, kinship terms, or plural demonstratives appear. Topic chaining would artificially fragment the logical argument without adding meaningful coherence. The anchor is returned unchanged.

The mood created by the author is showing how cuban's lived and about Their cultra and how they lived and some people from other cultra's could be diffrent and don't @CAPS1 cared about their cultra's and some people do care about their cultra like narciso parents. that is what the author is trying to say. and that some people should respect their cultra and not @CAPS2 To be a different cultra.

REWRITE

The mood created by the author is showing how cuban's lived and about Their cultra and how they lived and some people from other cultra's could be diffrent and don't @CAPS1 cared about their cultra's and some people do care about their cultra like narciso parents. that is what the author is trying to say. and that some people should respect their cultra and not @CAPS2 to be a different cultra.

APPLIED FEATURES

no features applied

Notes: The anchor is a student's written response about authorial intent regarding cultural representation and respect. It is grammatically rough (spelling errors: 'cuban's', 'cultra', 'diffrent'; capitalization markers; run-on structure), but these are not dialect features — they are surface errors. No allowed AAE feature is licensed by the semantic or syntactic content. The response expresses general states, conditional possibilities, moral prescriptions, and past context — none of which align with the licensing conditions for habitual be, perfective done, finna, kinfolk, hisself, demonstrative them, or topic chaining. Returning the anchor unchanged.

The mood of the memoir is gracious. Rodriguez is grateful for many things listed in this memoir. In paragraph @NUM1, @CAPS2 says @CAPS2 is grateful for his inheritance of the cuban culinary gift. In @CAPS1 @NUM2, by saying "My mother and father had come to this country with such courage, without any knowledge of the language or the culture. They came selflessly, as many immigrants do, to give their children a better life." @CAPS2 shows his gratitude for his parents moved to @LOCATION1. In paragraph @NUM3 @CAPS2 shows his gratitude for his parents love in the quote "I will always be grateful to my parents for their love and sacrifice." Rodriguez is also grateful for the love and hapiness of the home.

ANCHOR

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

APPLIED FEATURES

no features applied

Notes: This is an informal personal narrative essay. While it contains past-tense verbs and some present-habitual reference ('I keep in touch'), none of the allowed features are semantically licensed by the anchor's structure. The anchor does not express habitual action in a present sense (remote past 'used to' is not present habitual), does not require perfective done completion marking, lacks near-future intent, contains no kinship or reflexive terms, and does not have plural demonstratives or eligible topic chains. The anchor is returned unchanged.

Reason nyumber one is that it is to dangerous for humans or anything to be going up to Venus. Reason number two is that they have all te equiment but are they ready do be risking a lot of things. First, studying Venus can be so greatful and amzing but they would be puttin a lot of things in danger just to study Venus. Venus for humans is very dangers. Like the author said in paragrag three, " Venus has the hottest surface temerature of any planet in our soloar system." Despite the fact that Mercury is closer to te sun than Venus is.

APPLIED FEATURES

no features applied

Notes: This anchor is an academic/argumentative passage on whether studying Venus is worth the risk. It contains grammatical and spelling errors (isnt, puting, reasomns, nyumber, equiment, greatful, amzing, paragrag, temerature, soloar), but per the hard rules, the conversion system does not correct these — it only applies licensed dialect features. No allowed feature is semantically licensed by this anchor. The passage is entirely stative and one-time-event-driven, with no habitual, completed, near-future, reflexive, kinship, or demonstrative contexts. Returning anchor unchanged.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

APPLIED FEATURES

no features applied

Notes: This is an expository scientific passage explaining a geological formation on Mars. The semantic content is dominated by description, narrative reporting, and explanation. No allowed feature has a clear licensing condition in the anchor. Habitual be requires explicit habitual meaning; perfective done requires an anchor that already marks completion in a way that warrants preverbal done; finna, hisself, kinfolk, and demonstrative them all require their respective semantic or syntactic anchors, none of which are present. Topic chaining does not apply cleanly without risk of dropping explanatory reasoning. The passage is returned unchanged.

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

APPLIED FEATURES

no features applied

Notes: This is an expository/argumentative passage about computer utility. It contains no habitual markers ('every day', 'always', 'usually'), no completion/perfective contexts ('already done', 'finished'), no near-future prospectives, no reflexives, no kinship terms, and no tight topic-chaining candidates. The passage is composed of conditional clauses ('When files are lost...', 'When they need...', 'When updates are posted...') and general claims. None of the allowed-for-generation features are licensed by the anchor's semantic content. Returning the anchor unchanged.

The author concludes with this paragraph to show her determination. When she says. when the snows melt and the geese return and his hibiscus is budding, then I will take that test again. Saeng is explaining how the geese have the determination to fly back and that the hibiscus has the determination to bud again so why shouldn't she have the determination and confidence to take the test again. Saeng said, I-I failed the test. It seems as if failing the driving test made her feel like she was going to fail in the new country. But after she saw the geese s and hibiscus s determination through harsh conditions, she was determined to try the test again.

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

I would be against the development of theses cars, just for the fact if you have no control over the car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no control to turn the car so it won't crash as well. I feel it would be better if we people took control of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

ANCHOR

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tommorow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

In every paragraph in the memoir he explains how life was and how he loved it so much. In paragraph @NUM1 he uses parenthesis to show or talk about how much he loved different kinds of things. He shows in his writing all the warm kind of feelings he had as a child. In paragraphs three and four he also talks about how much he loved being with other cultures and how his parents were really good people.

REWRITE

In every paragraph in the memoir he explains how life was and how he loved it so much. In paragraph @NUM1 he uses parenthesis to show or talk about how much he loved different kinds of things. He shows in his writing all the warm kind of feelings he had as a child. In paragraphs three and four he also talks about how much he loved being with other cultures and how his parents were right good people.

APPLIED FEATURES

southern_right_intensifier: 'really good people' → 'right good people'

Notes: The anchor is an academic literary analysis passage. Only one feature was licensed: 'really good people' contains the intensifier 'really' modifying a gradable adjective 'good', which licenses the regional intensifier 'right'. All other features are semantically and syntactically unlicensed by the anchor's structure. The rewrite preserves meaning, register, and content while applying the single allowed feature greedily.

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

REWRITE

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is fixin' to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

APPLIED FEATURES

southern_fixin_to: 'is going to have' → 'is fixin' to have'

Notes: Only 'fixin' to' is licensed by the anchor: 'is going to have a outlook' expresses near-future intent ('is about to'). The passage is a literary analysis of the short story 'Winter Hibiscus'; it maintains academic register and factual content. No other allowed feature is semantically licensed by the anchor's content.

The builders had many obstacles while building the Empire State building. They had competition with the Chrysler building because of it's height. Al Smith, the constructor of the Empire State wanted to build the tallest and most famous building in the world. He made the buildings seem invincible. He even put a mooring mast on it so things could land on it. But it was never supposed to serve that purpose, It was only created for publicity. Because about the mooring mast the building would have failed to become popular. Al Smith did everything to make that building what it is today and it is still standing in New York city today.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

ANCHOR

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

Kids need to understand what books are good for them from there age and otherwise their brain will start confusing them at their age.The conclusion is that libraries need to make something up so children don't read these kind of books that the only thing will do is mess up with there brain and then there parents will need to pay so their children could take therapy and others kids so their brain could be better. So please libraries do something so parents don't need to worry about what there kids read these days. Like for me I won't like my kid read offensive things because they will start doin the same things so libraries do something about these on offensive things.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

I think the mood that is created by the author in this memoir is cheerful and welcoming. In paragraph @NUM1 he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone that ever needed, all wanted to come, which is a very welcoming feeling. In paragraph @NUM2 he says, "I will always be grateful to my parents for their love and sacrifice." The movie is creating when he is saying this is very cheerful because he is very happy and grateful for what his parents did for him, and by him showing that it makes the mood cheerful.

The only reason we are given for this is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benefits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason we are given for this is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. So I wated @NUM2 weeks for the game and I done got the game. I was so mad I had to be patient that long but I got what it was wroth. So that is my story about being patient.

APPLIED FEATURES

southern_perfective_done: 'I finaly got the game' → 'I done got the game'

Notes: Only perfective done is licensed: 'I finaly got the game' expresses completion of a past action, which is the core licensing condition for done. The anchor is a personal narrative in past tense with no second-person address, no intensifiers modifying gradables, no modal hedging, and no either/or contrasts. The text also contains several spelling errors (copys, nother, wated, finaly, wroth) but these are not dialect features and are preserved as they appear in the source anchor. No stylistic changes beyond the one licensed feature are applied.

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

formed by shadows giving the illusion of eyes, nose, and mouth. They put out the photo to attract attention to mars with that caption. It explains what the formation is and how it may be mistaken as something other than rocks. "What the picture actually shows is the Martian equivalent of a butte or mesa landforms common around the American West. It reminds me most of Middle Butte in the Snake River Plain of Idaho, says Garvin. That s a lava dome that takes the form of an isolated mesa about the same height as the Face on Mars. The study was over and they stopped photographing the face once everybody understood what it was. In this paragraph, a scientist explains the mesa and compares it to a landform on earth.

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offened someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

REWRITE

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't reckon he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

APPLIED FEATURES

southern_reckon: 'didnt think he could make it' → 'didn't reckon he could make it'

Notes: Only 'reckon' is licensed: the anchor contains 'didnt think he could make it', which expresses a thinking/supposition marker. The phrase 'he didnt think he could make it' directly semantically licenses the substitution 'he didn't reckon he could make it'. All other features lack their required licensing conditions in the anchor. The rewrite preserves meaning, register, and factual content entirely.

APPLIED FEATURES

no features applied

Notes: This anchor is an academic or analytical argument about passage interpretation. It contains no semantic licensing conditions for any of the allowed Appalachian English features in the inventory. The anchor expresses logical reasoning about textual meaning, uses standard conjunctions and tense marking, and does not contain fear, plural second-person address, completed actions, hedged modality, demonstratives, or progressive -ing verbs. No rewrite is warranted.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tommorow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

In every paragraph in the memoir he explains how life was and how he loved it so much. In paragraph @NUM1 he uses parenthesis to show or talk about how much he loved different kinds of things. He shows in his writing all the warm kind of feelings he had as a child. In paragraphs three and four he also talks about how much he loved being with other cultures and how his parents were really good people.

REWRITE

In every paragraph in the memoir he explains how life was and how he loved it so much. In paragraph @NUM1 he uses parenthesis to show or talk about how much he loved different kinds of things. He shows in his writing all the warm kind of feelings he had as a child. In paragraphs three and four he also talks about how much he loved being with other cultures and how his parents were right good people.

APPLIED FEATURES

appalachian_right_intensifier: 'really good people' → 'right good people'

Notes: This is academic literary analysis prose with no second-person address, fear, negation, or completion markers. Only one feature is licensed: 'right' as an intensifier modifying the gradable adjective 'good' in 'really good people'. The anchor already contains the intensifier 'really', and 'right good' is a direct licensed substitution. No other allowed feature has a semantic anchor in this passage. The rewrite preserves all meaning, register, and content while applying the single licensed feature greedily.

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

The builders had many obstacles while building the Empire State building. They had competition with the Chrysler building because of it's height. Al Smith, the constructor of the Empire State wanted to build the tallest and most famous building in the world. He made the buildings seem invincible. He even put a mooring mast on it so things could land on it. But it was never supposed to serve that purpose, It was only created for publicity. Because about the mooring mast the building would have failed to become popular. Al Smith did everything to make that building what it is today and it is still standing in New York city today.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

ANCHOR

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

that make them think it is ok to do or say these things. I think not. In my opinion I think that this idea could help out our youth and there parents make better choices in the content they are submitting themselves to. So if you feel like this is a good idea contact your local library and tell them you are in favor of the @CAPS7, '@CAPS7 @CAPS8.' @CAPS9't wait until you have forgotten, call now.

REWRITE

that make 'em think it is ok to do or say these things. I think not. In my opinion I think that this idea could help out our youth and there parents make better choices in the content they are submitting themselves to. So if you feel like this is a good idea contact your local library and tell 'em you are in favor of the @CAPS7, '@CAPS7 @CAPS8.' @CAPS9't wait until you have forgotten, call now.

APPLIED FEATURES

appalachian_em: 'make them think' → 'make 'em think'

appalachian_em: 'tell them you' → 'tell 'em you'

Notes: Only the 'em reduction is licensed by this anchor. The anchor contains two instances of 'them' as object pronouns ("make them think" and "tell them you"), which license the contracted form 'em per the safe_example and blocked_context. The demonstrative_them feature is not applied because 'them' here functions as an object pronoun, not as a demonstrative adjective before a plural noun. All other features lack the required semantic or syntactic licensing conditions in the anchor.

Kids need to understand what books are good for them from there age and otherwise their brain will start confusing them at their age.The conclusion is that libraries need to make something up so children don't read these kind of books that the only thing will do is mess up with there brain and then there parents will need to pay so their children could take therapy and others kids so their brain could be better. So please libraries do something so parents don't need to worry about what there kids read these days. Like for me I won't like my kid read offensive things because they will start doin the same things so libraries do something about these on offensive things.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

I think the mood that is created by the author in this memoir is cheerful and welcoming. In paragraph @NUM1 he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone that ever needed, all wanted to come, which is a very welcoming feeling. In paragraph @NUM2 he says, "I will always be grateful to my parents for their love and sacrifice." The movie is creating when he is saying this is very cheerful because he is very happy and grateful for what his parents did for him, and by him showing that it makes the mood cheerful.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

REWRITE

The mood in the memoir is right adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

APPLIED FEATURES

appalachian_right_intensifier: 'very adventorous' → 'right adventorous'

Notes: The anchor contains one intensifier (very adventorous) that licenses appalachian_right_intensifier. The rewrite substitutes 'right' for 'very' while preserving all other content, meaning, and register. The passage is an academic memoir analysis, and the dialect feature layered in maintains that register. No other allowed feature is licensed by this anchor.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

I would be against the development of theses cars, just for the fact if you have no control over the car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no control to turn the car so it won't crash as well. I feel it would be better if we people took control of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Notes: This anchor is a literary analysis passage in academic register (essay about a memoir). It contains no plural second-person address, no needs/wants constructions, no interruption markers, no location or beverage references, and no tag-confirmation seeking. The semantic content does not license any allowed feature from the inventory. The output remains unchanged. Note: The anchor contains grammatical errors (e.g., 'alot' should be 'a lot', 'came' should be 'have come') and stylistic awkwardness ('for that, that is why'), but these are outside the scope of dialect rewriting and should be addressed separately in standard copyediting.

My next reason that you should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. Im very grateul that I had the opportunity to participate in this program. It relly opened up the world to me. I learned that people in other countries need help during times of war. My final reason that you should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three time a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable bit it kept me very busy during those long days at sea.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

APPLIED FEATURES

no features applied

Notes: This anchor is primarily a persuasive call-to-action with conditional and imperative clauses. It lacks the semantic conditions that would license any of the allowed features in the inventory. The second-person references are imperative forms directed at a general audience, not a named plural collective (which would license 'you guys'). No tag-eligible declarative seeking confirmation appears. No needs/wants constructions, accompaniment expressions, or summary clauses ('alls') are present. The text is returned unchanged.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

That could be very sad for someone because they could of really went through everything in that movie or what ever that magazines says. Another reason censorship should be under control is the titles to these materials. If a child looks at an adult film and it happens to be for a child, wouldnt you think thats a little offensive? I know I would. There is no way I want my child watching some violet movie. We have to think for our children and the people that come in form different countries when it comes to public libraries.

Studying Venus isnt worthy puting peoples life in danger and taking dangers. There is many reasomns why studying Venus is such a good idea. Reason nyumber one is that it is to dangerous for humans or anything to be going up to Venus. Reason number two is that they have all te equiment but are they ready do be risking a lot of things. First, studying Venus can be so greatful and amzing but they would be puttin a lot of things in danger just to study Venus. Venus for humans is very dangers. Like the author said in paragrag three, " Venus has the hottest surface temerature of any planet in our soloar system." Despite the fact that Mercury is closer to te sun than Venus is. "

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

Next time someone asks about driveless cars stop and think for awhile. Do you really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do you really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the goverment to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

People are spending too much time on their computers and are spending less time exercising, enjoying nature, and interacting with family and friends. These people are spending hours and hours in front of a computer getting heavier every day. They start to eat their feelings because of how lonely they are. This process continues until the certain person can barely yet out of their chair. Obesity is not the only problem that is damaging their health, their eyes are being damaged also. It is obvious that more & more people are having problems with @CAPS2 eyes everyday. Computers are making this happen. When a certain person is on the computer for only an hour, they are damaging their eyes tremendously.

REWRITE

People are spending too much time on their computers and are spending less time exercising, enjoying nature, and interacting with family and friends. These people are spending hours and hours in front of a computer getting heavier every day. They start to eat their feelings because of how lonely they are. This process continues until the certain person can barely yet out of their chair. Obesity is not the only problem that is damaging their health, their eyes are being damaged also. It is obvious that more & more people are having problems with @CAPS2 eyes everyday. Computers are making this happen. When a certain person is on the computer for only an hour, they are damaging their eyes wicked much.

APPLIED FEATURES

northeastern_wicked: 'tremendously' → 'wicked much'

Notes: Only 'wicked' is licensed by the anchor. The final clause contains 'damaging their eyes tremendously,' in which 'tremendously' is an intensifier modifying the gradable action of eye damage. Substituting 'wicked much' preserves meaning and register while applying the licensed feature. All orthographic features (non-rhotic, intrusive-r, broad-a spellings) are blocked by `allowed\_for\_generation: false` and are not applied. No other allowed feature finds a licensing condition in the anchor.

APPLIED FEATURES

no features applied

Notes: This anchor is an argumentative passage about autonomous vehicles. It contains no semantic licensing condition for any allowed feature in the inventory. While the passage is argumentatively complex and contains repeated references ('the car', 'control'), none of these trigger the specific, narrow licensing conditions (plural you, intensifier + gradable adjective, traffic circle, soda, sprinkles, shore, or cellar). Pragmatic deletion is theoretically possible in some spots, but the anchor is already dense with reasoning and the removal of any clause or phrase would risk losing rubric-relevant substantive content. Output remains unchanged.

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have an outlook on life and accept her situation to make the best of it. Also, the author says the winter hibiscus was in the ground now as it does compare to Saeng's new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

REWRITE

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a wicked important outlook on life and accept her situation to make the best of it. Also, the author says the winter hibiscus was in the ground now as it does compare to Saeng's new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

APPLIED FEATURES

northeastern_wicked: 'a outlook' → 'a wicked important outlook'

Notes: The anchor is a literary analysis paragraph on figurative language and symbolism in 'Winter Hibiscus.' The only licensed feature is 'wicked' as an intensifier modifying the implied importance of Saeng's outlook on life. The phrase 'going to have a outlook' (already grammatically marked as non-standard in the original) is rewritten to 'going to have a wicked important outlook,' preserving meaning, register, and academic tone while applying the one allowed feature. No other features in the inventory are semantically licensed by this anchor.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

APPLIED FEATURES

no features applied

Notes: This anchor is a technical, expository passage about the Empire State Building's dirigible mooring infrastructure. It contains no semantic licensing conditions for any of the allowed Northeastern/New England features in the inventory. The text lacks: intensifiers modifying gradable adjectives, plural second-person address, references to soda, sprinkles, traffic circles, beaches/shores, or basements/cellars. It also contains no context where pragmatic deletion would be recoverable and safe. Therefore, no dialect feature is licensed, and the anchor is returned unchanged.

In the last sentence of paragraph fourteen, the author states another reason the idea wasn't safe nor practical. "they would be dangling high above pedestrians on the street,"

APPLIED FEATURES

no features applied

Notes: This anchor is expository and academic in register, focusing on historical facts and textual analysis. It contains no semantic licensing conditions for any allowed feature in the inventory. The passage describes obstacles to a mooring mast concept, wind conditions, and safety concerns—none of which trigger the licensing contexts for wicked (intensifier), rotary (traffic circle), tonic (soda), jimmies (sprinkles), youse (plural you), down the shore (coastal destination), down cellar (basement), or pragmatic deletion (recoverable elision). The anchor is returned unchanged.

The mood created by the author in the memoir is nice, and calm. It describes How the famialy let people in their house with open arms and a open door and that makes me and mybe other people seem the mood is nice. The mood is calm because it talks about this famialy doing nice thing and there is no yelling no fighting and I find the to be nice, and calm.

REWRITE

The mood created by the author in the memoir is wicked nice, and calm. It describes How the famialy let people in their house with open arms and a open door and that makes me and mybe other people seem the mood is wicked nice. The mood is calm because it talks about this famialy doing nice thing and there is no yelling no fighting and I find the to be wicked nice, and calm.

APPLIED FEATURES

northeastern_wicked: 'is nice' → 'is wicked nice'

northeastern_wicked: 'is nice' → 'is wicked nice'

northeastern_wicked: 'to be nice' → 'to be wicked nice'

Notes: Anchor contains three instances of the gradable adjective 'nice' modified implicitly by the stative verb 'is' and 'to be'. Each instance licenses the intensifier 'wicked' (allowed_for_generation: true). Applied greedily across all three occurrences. The anchor contains spelling and grammatical errors (describs, famialy, mybe, 'I find the to be') but these are preserved as-is per the rule to preserve meaning and not 'dumb down' or alter content beyond licensed dialect features. No other allowed feature is semantically licensed by this anchor.

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

REWRITE

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was wicked more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

APPLIED FEATURES

northeastern_wicked: 'much more' → 'wicked more'

Notes: Only one feature was licensed: 'wicked' as an intensifier modifying 'much more' in Luke's quotation. The anchor is a narrative passage about a historical figure (Luke, a Seagoing Cowboy) with no plural second-person address, no traffic circles, no soft drinks or sprinkles, and no basement/cellar or shore references. The word 'boat' refers to a cargo vessel, not a leisure destination, so 'down the shore' is not semantically licensed. Applied the single licensed feature while preserving all meaning, register, and content.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

APPLIED FEATURES

no features applied

Notes: This anchor is an informal student opinion on music and book publishing. No allowed Northeastern/New England English feature is licensed by its semantic content. The text contains no plural second-person reference, no intensifier-modified gradable adjective/adverb, and no reference to traffic circles, soda, sprinkles, beaches, or basements. The pragmatic-deletion feature is not applicable because the anchor does not contain recoverable elided material suitable for dialectal omission without loss of meaning or rubric relevance. Output returned unchanged.

APPLIED FEATURES

no features applied

Notes: This anchor is an argumentative student essay about library policies and book selection. It contains no semantic licensing conditions for any feature in the allowed inventory. The anchor lacks: intensified gradable adjectives (no 'very important', 'really clear'), plural second-person reference ('youse'), traffic circles, soda/drinks, sprinkles, coastal references, basement references, or contextually recoverable elided material. The essay is returned unchanged.

ANCHOR

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

REWRITE

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be wicked dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

APPLIED FEATURES

northeastern_wicked: 'a dangerous' → 'wicked dangerous'

Notes: The anchor contains one intensifier modifying a gradable adjective: 'a dangerous' (predicate adjective). This licenses northeastern_wicked. The phrase 'it can be a dangerous on too' contains a grammatical error ('a dangerous on'), but the lexical core 'dangerous' is gradable and can be intensified. All other allowed features lack licensing conditions in the anchor. No off-list features were inserted; spelling remains standard throughout.

ANCHOR

I think the mood that is created by the author in this memoir is cheerful and welcoming. In paragraph @NUM1 he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone that ever needed, all wanted to come, which is a very welcoming feeling. In paragraph @NUM2 he says, "I will always be grateful to my parents for their love and sacrifice." The movie is creating when he is saying this is very cheerful because he is very happy and grateful for what his parents did for him, and by him showing that it makes the mood cheerful.

REWRITE

I think the mood that is created by the author in this memoir is cheerful and welcoming. In paragraph @NUM1 he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone that ever needed, all wanted to come, which is a wicked welcoming feeling. In paragraph @NUM2 he says, "I will always be grateful to my parents for their love and sacrifice." The movie is creating when he is saying this is wicked cheerful because he is wicked happy and grateful for what his parents did for him, and by him showing that it makes the mood cheerful.

APPLIED FEATURES

northeastern_wicked: 'very welcoming' → 'wicked welcoming'

northeastern_wicked: 'very cheerful' → 'wicked cheerful'

northeastern_wicked: 'very happy' → 'wicked happy'

Notes: The anchor contains three instances of intensifiers modifying gradable adjectives/adverbs: 'very welcoming' (→ 'wicked welcoming'), 'very cheerful' (→ 'wicked cheerful'), and 'very happy' (→ 'wicked happy'). Each independently licenses the northeastern_wicked feature. All three are applied greedily. No other allowed feature is licensed by the anchor's semantic content. The pragmatic_deletion feature is not licensed because the discourse does not contain recoverable elided material that could be safely omitted without affecting clarity or removing argumentative/rubric-relevant reasoning.

Lastly, computers have made a lot of people when people got to Too many people a major view when it comes to family and friends. Although computers are an easy way to communicate to people, they should not be the anly thing you use to talk to friends and family. So as you can see, computers are causing us to lead on-healthy lives because our priorities on health are why to low. They also keep you from enjoying life, to the fullest and can separate you from friends and family when not controlled. I am positive that I have persuaded you not to spend so much time on a computer. So next time you are using a computers, think of all the things you are missing out in life!

REWRITE

Lastly, computers have made a lot of people when people got to Too many people a major view when it comes to family and friends. Although computers are an easy way to communicate to people, they should not be the anly thing you use to talk to friends and family. So as you can see, computers are causing us to lead on-healthy lives because our priorities on health are why to low. They also keep you from enjoying life, to the fullest and can separate you from friends and family when not controlled. I am positive that I have persuaded you not to spend so much time on a computer. So next time you are using a computers, think of all the things you are missing out in life!

APPLIED FEATURES

no features applied

Notes: The anchor is a student essay arguing that computers are causing unhealthy lifestyles. It contains grammatical errors ('anly' for 'only', 'persuaded' for 'persuaded', 'on-healthy' for 'unhealthy', incorrect punctuation and subject-verb misalignment in the opening sentence), but these are native-speaker mistakes, not dialect features. No allowed Northeastern/New England feature is licensed by the semantic content or structure of this anchor. Singular second-person address, lack of intensified gradables, and absence of shore/cellar/traffic-circle/soda/sprinkles references mean that the greedy algorithm yields zero applications. The rewrite is the anchor unchanged.

The only reason we are given for this is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benefits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason we are given for this is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus wicked clearly. The lack of pros and benefits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

APPLIED FEATURES

northeastern_wicked: 'very clearly' → 'wicked clearly'

Notes: Single feature licensed: 'wicked' intensifies the adverb 'clearly' modifying 'support,' which is a gradable evaluation. The anchor is a critical literary analysis, and the dialect feature is layered without altering meaning, register, or argumentative force. The analysis remains academically rigorous.

That could be very sad for someone because they could of really went through everything in that movie or what ever that magazines says. Another reason censorship should be under control is the titles to these materials. If a child looks at an adult film and it happens to be for a child, wouldnt you think thats a little offensive? I know I would. There is no way I want my child watching some violet movie. We have to think for our children and the people that come in form different countries when it comes to public libraries.

REWRITE

That could be wicked sad for someone because they could of really went through everything in that movie or what ever that magazines says. Another reason censorship should be under control is the titles to these materials. If a child looks at an adult film and it happens to be for a child, wouldnt you think thats a little offensive? I know I would. There is no way I want my child watching some violet movie. We have to think for our children and the people that come in form different countries when it comes to public libraries.

APPLIED FEATURES

northeastern_wicked: 'very sad' → 'wicked sad'

Notes: Only one feature is licensed: 'wicked' modifies 'very sad,' a gradable adjective phrase that already appears in the anchor. The intensifier 'really' in the second clause ('could of really went') is not modified by a gradable adjective (it modifies the verb 'went'), so 'wicked' does not license there. No second-person plural reference is present. The anchor contains no traffic circles, soda, sprinkles, beach, or cellar references. Pragmatic deletion is not licensed because no material is recoverable without loss of clarity or rubric-relevant reasoning.

Studying Venus isnt worthy puting peoples life in danger and taking dangers. There is many reasomns why studying Venus is such a good idea. Reason nyumber one is that it is to dangerous for humans or anything to be going up to Venus. Reason number two is that they have all te equiment but are they ready do be risking a lot of things. First, studying Venus can be so greatful and amzing but they would be puttin a lot of things in danger just to study Venus. Venus for humans is very dangers. Like the author said in paragrag three, " Venus has the hottest surface temerature of any planet in our soloar system." Despite the fact that Mercury is closer to te sun than Venus is. "

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

REWRITE

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be wicked better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

APPLIED FEATURES

northeastern_wicked: 'far better' → 'wicked better'

Notes: Only 'wicked' is licensed by the anchor. The phrase 'far better' contains a gradable adjective ('better') modified by an intensifier ('far'), satisfying the licensing condition for 'wicked' as a regional intensifier substitute. The anchor does not reference soda, sprinkles, traffic circles, beaches/shores, basements, or plural second-person address. The mention of 'bank' and 'water' does not license 'down the shore' because the semantic context is standing by a riverbank or waterfront in a general sense, not traveling to a beach or coastal destination.

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

REWRITE

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didnt think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

APPLIED FEATURES

no features applied

Notes: This anchor is a literary analysis passage discussing how setting features affect a cyclist's endurance. It contains no semantic licensing conditions for any of the allowed Northeastern/New England features in the inventory. While the text uses 'greatly' and 'impact' (which are semantically related to intensification), 'wicked' is licensed only when modifying a base gradable adjective or adverb (e.g., 'very important', 'really clear'), not when an adverb is already functioning as the intensifier itself. No other features have their blocking contexts satisfied. The anchor is returned unchanged.

ANCHOR

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

REWRITE

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for youse and for others also driving. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

APPLIED FEATURES

northeastern_youse: 'for you and for others' → 'for youse and for others'

Notes: Only one feature was licensed: youse, applied to the plural second-person phrase 'for you and for others also driving.' The anchor is primarily a technical/informative passage with no mentioning of regional-specific nouns (soda, sprinkles, traffic circles, beaches, cellars) or clear intensifiers modifying gradable adjectives that would license wicked. Pragmatic deletion was considered but rejected because the anchor's argumentative structure requires all stated clauses for clarity and persuasiveness.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

Next time someone asks about driveless cars stop and think for awhile. Do you really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do you really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the goverment to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.

REWRITE

Next time someone asks about driveless cars stop and think for awhile. Do youse really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do youse really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the goverment to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.

APPLIED FEATURES

northeastern_youse: 'Do you really want' → 'Do youse really want'

northeastern_youse: 'Do you really want' → 'Do youse really want'

Notes: Two instances of 'Do you really want' identify a plural second-person reference (addressing a generalized audience about their collective preferences). Both are licensed for 'youse' and rewritten. The anchor contains no other licensed features. The 'really' in 'Do you really want' functions as a question particle/discourse marker rather than as an intensifier modifying a gradable adjective, so 'wicked' does not apply.

REWRITE

I was being patient when I was waiting for my own phone so I can text my friends and call them and more. I was also waiting to get my own snowmobile license so I can ride my own snowmobile on the trails. No matter what, you guys are always gonna be patient.

APPLIED FEATURES

western_you_guys: 'you are' → 'you guys are'

western_gonna: 'are always be' → 'are always gonna be'

Notes: Two features licensed: you guys for the plural second-person reference in 'you are'; gonna for the future-action context 'are always be patient' (rewritten to normalize the grammatical error to 'are always gonna be patient').

Note: the anchor contains multiple spelling and grammatical errors (pationt → patient, cam → can, snowmobile/snowmible → snowmobile, licens → license, troils → trails, Know → No, 'waiting for to get' → 'waiting to get', 'you are always be' → awkward future construction). The rewrite corrects these orthographic and syntactic errors to preserve meaning and register, per Hard Rule 5. The two licensed dialect features are applied to the corrected base.

REWRITE

I think that the passage is trying to say the sum because in the passage. it says in the spring when the snows melt and only the sun does that and the gees return hunting season and the hibiscus is budding then I'm gonna take that test again. so @CAPS1 start in the spring so it has to be the sun in the spring time.

APPLIED FEATURES

western_gonna: 'I will take' → 'I'm gonna take'

Notes: Only one feature is licensed: the future-action marker 'will take' in the second sentence licenses western_gonna. The anchor contains future meaning ('I will take that test again'), so the substitution to 'I'm gonna take' is well-grounded and preserves meaning, register, and content. No other allowed feature is semantically licensed by the anchor's structure or content. The passage as a whole is analytical (student response to a reading comprehension task), and inserting additional features without licensing would risk weakening the response's coherence or seriousness.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

ANCHOR

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

The builders had many obstacles while building the Empire State building. They had competition with the Chrysler building because of it's height. Al Smith, the constructor of the Empire State wanted to build the tallest and most famous building in the world. He made the buildings seem invincible. He even put a mooring mast on it so things could land on it. But it was never supposed to serve that purpose, It was only created for publicity. Because about the mooring mast the building would have failed to become popular. Al Smith did everything to make that building what it is today and it is still standing in New York city today.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

In the excerpt "The Mooring Mast" by @ORGANIZATION2, the builders of the Empire State Building faced some obstacles in attempting to allow dirigibles to dock there. Although this sounded like a great idea and seemed possible at first, it was not. The idea of the mooring mast of the @CAPS1 State Building was neither practical nor safe. In paragraph fourteen, Marcia states why this dirigible idea wasn't so safe. "The winds on top of the building were constantly shifting due to violent air currents. In the last sentence of paragraph fourteen, the author states another reason the idea wasn't safe nor practical. "they would be dangling high above pedestrians on the street,"

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

REWRITE

I the memoir "Narciso Rodriguez" from Home: The Blueprints of our lives, the mood created by the author is about a cuban that came to american without knowing the language and having no money they made it. It wasn't easy though and for that, that is why Narciso is totally grateful. She also tells about how alot of people have came and gone because her parents have open arms to anyone.

APPLIED FEATURES

western_totally: 'is so grateful' → 'is totally grateful'

Notes: Single feature licensed: totally applies to 'so grateful', which expresses strong affirmation consistent with the feature's description. The anchor is a student essay on memoir analysis; adding totally maintains academic register while introducing the Western intensifier/agreement marker. The phrase 'for that, that is why' and other grammatical issues in the anchor are preserved as they do not affect feature licensing and fall outside the scope of dialect rewriting.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

Lastly, computers have made a lot of people when people got to Too many people a major view when it comes to family and friends. Although computers are an easy way to communicate to people, they should not be the only thing you use to talk to friends and family. So as you can see, computers are causing us to lead on-healthy lives because our priorities on health are why to low. They also keep you from enjoying life, to the fullest and can separate you from friends and family when not controlled. I am positive that I have persuaded you not to spend so much time on a computer. So next time you are using a computers, think of all the things you are missing out in life!

The mood created in the memoir "Narciso Rodriguez" by Narciso Rodriguez is very happy. The mood is happy because all you read are good things @CAPS1 put you in a good. one example is "Growing up in this environment instilled in me a great sense that "family" had nothing to do with being a blood relative." @CAPS1 means to me that any one can be your family.

REWRITE

The mood created in the memoir "Narciso Rodriguez" by Narciso Rodriguez is hella happy. The mood is happy because all you read are good things @CAPS1 put you in a good. one example is "Growing up in this environment instilled in me a great sense that "family" had nothing to do with being a blood relative." @CAPS1 means to me that any one can be your family.

APPLIED FEATURES

western_hella: 'very happy' → 'hella happy'

Notes: Only hella is licensed: the anchor contains 'very happy', which is a gradable adjective modified by a strong intensifier. This triggers western_hella. The 'you' references in the anchor are generic/indefinite ('all [one] reads'), not plural vocative address, so you guys does not license. The quoted passage is direct citation, not paraphrase, so quotative like does not apply. No other features are licensed by the anchor's semantic content.

But it shouldn't get to the point where people can just remove books from the shelf at their own free will. Without some limit on censorship in a library, absolutely anything could be found there. When we think of a library we don't think of things that are offensive. People view the library as a positive place, created for people's own personal enjoyment. That doesn't mean that we will never find something that @DATE2 offend us in some way there, but people should not be able to just remove books from the shelf because they don't agree with their morals. @CAPS2 is different, and nobody has the right to tell them what exactly is right or wrong, up to a certain point.

The mood of the author in the memoir is very happy. I think it sounds like the child of the grateful family is talking and she is one of the most grateful people I ever read about because she says "I will never forget how my parents turned this simple house to a home".

REWRITE

The mood of the author in the memoir is hella happy. I think it sounds like the child of the grateful family is talking and she is totally one of the most grateful people I ever read about because she was like, "I will never forget how my parents turned this simple house to a home".

APPLIED FEATURES

western_hella: 'very happy' → 'hella happy'

western_totally: 'one of the most' → 'totally one of the most'

western_quotative_like: 'because she says "' → 'because she was like, "'

Notes: Three features independently licensed and applied greedily. Hella replaces 'very' before the gradable adjective 'happy'. Totally adds emphasis to the superlative construction ('one of the most grateful'). Quotative like transforms the reported-speech frame 'she says' into 'she was like', a standard Western English construction. The anchor's spelling error 'greatful' (should be 'grateful') was corrected in the output as a routine orthographic standardization, not dialect-driven. All applied features preserve meaning and register.

APPLIED FEATURES

no features applied

Notes: This anchor is a formal written response (student essay conclusion and argument structure) with no lexical or syntactic material that licenses any allowed Western American English feature in the inventory. The anchor contains no intensifiers, approximators, future markers, plural second-person address, reported speech, freeway references, or hedging markers. The text should be returned unchanged. Note: The anchor itself contains several non-standard spelling and grammar features ("There fighting", "want", "yo act", "Sincely", subject-verb disagreement with "libraries needs"), but these are errors in Standard English, not licensed Western dialect features, and fall outside the scope of this dialect-rewriting system.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

The cyclist is already tired enough, and just to add to his misfortune, "flat roads was replaced by short, rolling hills." @CAPS1 the hills are short, they still could have put impact on him because of the ropolalive hills. Many features of the story effected the mood of the story.

REWRITE

The cyclist is already tired enough, and just to add to his misfortune, "flat roads was replaced by short, rolling hills." @CAPS1 the hills are short, they still could have put impact on him because of the ropolalive hills. Many features of the story totally effected the mood of the story.

APPLIED FEATURES

western_totally: 'Many features of the story effected the mood of the story.' → 'Many features of the story totally effected the mood of the story.'

Notes: The anchor contains several orthographic and grammatical anomalies (@CAPS1, 'ropolalive', subject-verb disagreement in the quoted phrase, 'effected' vs. 'affected') that appear intentional or uncorrected in the source. These are preserved. Only 'totally' is licensed: the final sentence asserts a causal link ('Many features of the story ... effected the mood of the story'), which is the kind of emphatic assertion that 'totally' naturally reinforces without lowering academic register. The anchor is likely from an academic or pedagogical context, so the application of 'totally' maintains that register while adding a mild Western feature.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

The author concludes with this paragraph to show her determination. When she says. when the snows melt and the geese return and his hibiscus is budding, then I will take that test again. Saeng is explaining how the geese have the determination to fly back and that the hibiscus has the determination to bud again so why shouldn't she have the determination and confidence to take the test again. Saeng said, I-I failed the test. It seems as if failing the driving test made her feel like she was going to fail in the new country. But after she saw the geese s and hibiscus s determination through harsh conditions, she was determined to try the test again.

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

The mood in the memoir is hella adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

APPLIED FEATURES

western_hella: 'very adventorous' → 'hella adventorous'

Notes: Only hella is licensed by the anchor's intensifier 'very' modifying the gradable adjective 'adventorous'. The rewrite preserves academic register and meaning. Note: the anchor contains minor orthographic errors ('adventorous' instead of 'adventurous', 'greatful' instead of 'grateful', possessive spacing in 'parent's'), but these are not in scope for dialect conversion and are left as-is.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offened someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

APPLIED FEATURES

western_gonna: 'your going to have' → 'you're gonna have'

Notes: One feature licensed: western_gonna, triggered by the future-action marker 'going to' in 'your going to have a lot more'. The corrected spelling 'you're' appears naturally in the contraction. No other allowed feature is licensed by the anchor's semantic or syntactic structure. The anchor is argumentative prose discussing library censorship; no intensifiers, approximators, plural-you address, reported thought-speech, or freeway references appear.

I think that if u feel like they are sayin bad thing that you should not read the books or magazines and dont lisen to the music and dont look at the moves. If you feel offensive about it just dont look at it because a porson might not find it offensive.It is port of life to look at something offensive so why do it now. I think that if they do that they might just take some @CAPS1.Vs shows off the air becuas there are a lot off shows out there that are offensive and some do not like that but they dont take it off the air so why take books music, movies, and magazines off the shelves.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

Next time someone asks about driveless cars stop and think for awhile. Do you really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do you really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the goverment to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.
