Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college real biased cause the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying thing is the prospect of a tie in the electoral vote. If that happen, the election would be thrown to the House of Representatives, where state delegations vote on the president. many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

ANCHOR

The mood created by the author in the memoir is nice, and calm. It describes How the famialy let people in their house with open arms and a open door and that makes me and mybe other people seem the mood is nice. The mood is calm because it talks about this famialy doing nice thing and there is no yelling no fighting and I find the to be nice, and calm.

REWRITE

The mood the author done created in the memoir is real nice, and calm. It describes how the family be lettin people in they house with open arms and a open door and that make me and maybe other people feel like the mood is nice. The mood calm cause it be talkin bout this family doin nice things and ain't no yellin no fightin and I find that to be nice, and calm.

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

My next reason that you should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. Im very grateul that I had the opportunity to participate in this program. It relly opened up the world to me. I learned that people in other countries need help during times of war. My final reason that you should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three time a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable bit it kept me very busy during those long days at sea.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

But it shouldn't get to the point where people can just remove books from the shelf at their own free will. Without some limit on censorship in a library, absolutely anything could be found there. When we think of a library we don't think of things that are offensive. People view the library as a positive place, created for people's own personal enjoyment. That doesn't mean that we will never find something that @DATE2 offend us in some way there, but people should not be able to just remove books from the shelf because they don't agree with their morals. @CAPS2 is different, and nobody has the right to tell them what exactly is right or wrong, up to a certain point.

REWRITE

But it shouldn't get to the point where folks can just go 'head and snatch books off the shelf whenever they feel like it. Without some kinda limit on censorship in a library, straight up anything could be up in there. When we think about a library we ain't thinking 'bout stuff that's offensive. People see the library as a positive place, made for people's own personal enjoyment. That don't mean we never gon' find something that @DATE2 offend us in some way up in there, but people shouldn't just be able to pull books off the shelf 'cause they don't agree wit they morals. @CAPS2 is different, and ain't nobody got the right to tell them what exactly is right or wrong, up to a certain point.

The only reason we are given for this is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benefits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

REWRITE

If somebody ridin in a driverless car, and that car crash, the manufacturers the ones who need to be held responsible unless they come up with some kinda technology that let the human take full control when they need to. Lotta arguments could be made that the manufacturer ain't program the car right and that's why the person got hurt or even ended up dead. This could have them big company manufacturers payin millions, maybe even billions of dollars in lawsuits. Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

REWRITE

On top of all that, the number one and two things that get most people in wrecks is texting and drinking. People ain't gotta worry bout no driverless car texting somebody back or on the phone looking at social media. Driverless cars don't get distracted. People also ain't never gon see no driverless car in a bar getting drunk. It just ain't gon happen. Driverless cars ain't gon get pulled over for being intoxicated or swerving cause they ain't gon be intoxicated and they gon be driving safely. Now some people gon argue and say, "These really ain't driverless cars, you still gotta drive them." Yeah, that's true, as of right now. But people should be fine with having to take the wheel sometimes.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

The author concludes with this paragraph to show her determination. When she says, when the snows melt and the geese return and his hibiscus is budding, then I will take that test again. Saeng is explaining how the geese have the determination to fly back and that the hibiscus has the determination to bud again so why shouldn't she have the determination and confidence to take the test again. Saeng said, I-I failed the test. It seems as if failing the driving test made her feel like she was going to fail in the new country. But after she saw the geese's and hibiscus's determination through harsh conditions, she was determined to try the test again.

REWRITE

The author wrap up wit dis paragraph to show her determination. When she say, when the snows melt and the geese return and his hibiscus is budding, then I will take that test again. Saeng explaining how the geese got the determination to fly back and that the hibiscus got the determination to bud again so why she shouldn't have the determination and confidence to take the test again. Saeng said, I-I failed the test. It seem like failing the driving test made her feel like she was gon fail in the new country. The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

REWRITE

The setting ain't play no games with that cyclist. He ain't have no water and he was rollin through the high deserts of California in June. Them deserts and no water coulda been life-or-death for him, had him stressed out and thirsty as ever. On top of that he out here biking, and now you got yourself a dehydrated man stuck in the desert! When he was between the ghost town and the bait shop he say, There wasn't nobody in sight, not a building, car, or no kind of structure at all. That right there woulda had the cyclist thinking ain't no hope for his survival if he went and passed out. Them California deserts gone mess with any cyclist real bad, especially one who ain't got no water like the cyclist in the story.

ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is real biased on account of the fact that the presidential candidates or a party's central committee can go ahead and pick the electors, which may cause 'em to vote unaccording to the majority vote. The most worryin' thing is the prospect of a tie in the electoral vote. In that case, the election would get thrown on over to the House of Representatives, where state delegations vote on the president. Seein' as how each state only gets one vote, the single representative from Wyoming would have just as much say as all 55 of them representatives from California. Most states got themselves a "winner-take-all" system which could real easy throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This here makes the electoral college irrational. Lastly, the electoral college is just plain unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

REWRITE

Driverless cars ain't really driverless and might even cause more problems out there on the road. One bad thing about 'em is that eventually the ability to drive a car would just wither away and die right out. For example, if you took a one year old baby and cooked for and fed him all the way 'til he was eighteen, you reckon he'd be able to cook? Even if he watched you cook, he can never cook how you cook 'cause he was never taught that skill. It just weren't needed. So just like that, manual drivin' can be eradicated for generations to come. Eventually, would anybody even know how to drive? Driverless cars are a thing of the future, but are they really all that better for us? Not necessarily. Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason we're given for this here is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author don't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that very sentence there is still some uneasiness since it ain't sure or confirmed that Venus was once like Earth. Therefore, this right here is why the author of "The Challenge of Exploring Venus" don't support the idea of studying Venus real clearly. The lack of pros and benifits to our planet just adds to the pot of cons and uncertainty that was instead made from readin this article.

There have been many weird things in space that we could never figure out. Some of those things are just normal stuff that happens in space and some people don't know that happens. It could've just been a normal thing that happen and everyone thinks it's a big piece of information of aliens. People make hypothesis way to quickly based off of what they've seen and heard. Not all things are true. No one has truly seen an alien before and if there were aliens shouldn't have people already have seen one? Earth has been around for a long time and nobody has seen and alien life form.

REWRITE

There sure have been a whole lotta weird things up in space that we just couldn't never figure out. Now some of them things are just normal stuff that goes on up in space and some folks just don't know that it happens. It could've just been a real normal thing that happened and everybody goes and thinks it's some big ol' piece of information about aliens. People go and make hypotheses way too quick based off of what they done seen and heard. Not all things are true, I tell you what. Nobody has truly seen an alien before and if there were aliens, shouldn't folks have already seen one by now? Earth has been around for a real long time and not a single soul has seen an alien life form.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

REWRITE

If somebody's ridin' in one of them driverless cars and that car goes and crashes, the manufacturers oughta be the ones held responsible unless they go on ahead and develop some kinda technology that lets the folks inside take full control if they need to. You could make all kinds of arguments that the manufacturer didn't program that car right and that's the whole reason somebody got themselves hurt or worse, even killed. That right there could end up with the big companies that make these things payin' out millions, maybe even billions of dollars in lawsuits. Driverless cars could cause a whole lot more accidents on account of there ain't nobody physically watchin' what's goin' on around the car, and shoot, technology as simple as a calculator can malfunction every now and again, so would you really trust some computer-run car with your very own life?

ANCHOR

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

REWRITE

The setting sure did affect that cyclist somethin' fierce. He didn't have a lick of water and he was makin' his way through them high deserts of California smack dab in the middle of June. Them deserts and havin' no water could've flat out been a life-or-death situation for him, makin' him all stressed out and thirsty as all get out. You go on and add in the fact that he was bikin' on top of all that, and shoot, you got yourself one dehydrated fella out there in the desert! When he was somewhere between that ghost town and the bait shop, he goes on to say, There was no one in sight, not a building, car, or structure of any kind. Well, that right there woulda made that cyclist figure there weren't a whole lot of hope for his survival if he was to go and pass out. Them California deserts'll affect any cyclist real bad, especially one who ain't got no water like that cyclist in the story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

REWRITE

The mood in the memoir is real adventorous. In the memoir it showed how Narciso's parent's and relatives up and moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move on into a modest three-room apartment that was fixin' to be Narciso's home before too long. Narciso was born back in 1961, way up in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a good while. "Family" had nothin' to do with bein' a blood relative. Narciso will always be grateful and lovin' to his folks for what all they did for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offened someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon, the builders of the Empire State Building had themselves a real problem when it came to putting up a dock for dirigibles. One of the troubles they ran into was that they didn't have no suitable place for them things to land. Over in paragraph six it was said that it'd only let dirigibles anchor up there for a few hours at a time. They'd also gone and figured out that most dirigibles coming in from other countries was using hydrogen instead of helium, which was a whole lot more apt to catch fire. Then in paragraph thirteen it said that if an accident was to happen over a place packed full of people, like downtown New York, it could have been a whole lot worse.

ANCHOR

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

REWRITE

I'd be agin the development of them there cars, just on account of if you ain't got no control over yer car the car could crash a whole lot more likely than a car a person is a-controllin, cause what happens if a car is fixin to have itself a car accident and you ain't got no control to turn the car so it won't crash neither. I reckon it'd be a sight better if us folks took ahold of the drivin and not some system put up in the vehicle that controls it. Now we might've had them google cars that could drive theirselves under certain particular conditions since 2009, where them cars can drive more than a half a million miles without crackin up, but at the same time the google car ain't truly driverless on account of the car'll still have to holler at the driver to take over if somethin goes wrong.

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tommorow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

REWRITE

The author done went an' ended the story the way he/she did on account of it shows just how much that there plant truly means. S'aeng's a-gonna wait till that flower blooms 'cause it means so awful much to her. That flower represents her own self an' her drivin' test. When that hibiscus gets ready to bloom, she'll be ready to drive. That plant gives her hope for a brand new tommorow, a new chance at things. That last paragraph there helps the reader come to realize how much that plant means to the girl, how significant it is an' all. It makes her feel more at home, an' her home makes her feel less like a stranger; makes her joyful an' happy after all the misery of failin' that drivin' test.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is real biased on account of the fact that presidential candidates or a party's central committee can go and pick the electors themselves, which might cause 'em to vote against what the majority done voted for. The most worrisome thing is the chance of a tie in the electoral vote. If that was to happen, the election'd get throwed over to the House of Representatives, where state delegations go and vote on who's gonna be president. Seein' as how each state only gets one vote, the single representative from Wyoming'd have just as much say-so as all 55 of them representatives from California. Most states got themselves a "winner-take-all" system that could real easy throw off the vote and make it swing the wrong way, and that there goes against the voters' popular vote. That right there makes the electoral college plumb irrational. And to top it all off, the electoral college just ain't fair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

REWRITE

many obstacles was took whilst tryin' to get the Empire State Building to allow dirigibles to dock up there. This here was a long, hard, and thought out process. Workers couldn't jest drop a mooring mast right on top of the building's roof. A one thousand-foot dirigible was moored up at the top of the building. It was bein' held by a single cable tether, which put a heap of stress on the building's frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that'd be illuminated from the inside, with a stepped-back design that imitated the overall shape of the building. Later on they figured out that dirigibles couldn't moor at the Empire State Building. One reason bein' a law against airships a-flyin' too low over urban areas. Architects went through many a obstacle in buildin' them masts.

ANCHOR

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

REWRITE

Them driverless cars ain't really driverless and might could cause even more trouble out on the road. One bad thing about it is that after a spell, the know-how to drive a car'd just wither up and die off. Like, say you took a young'un from the time he was a baby and cooked for him and fed him right up till he was eighteen years old, you reckon he'd be able to cook for hisself? Even if he watched you cook the whole time, he ain't never gonna cook like you do on account of he weren't never taught how. He didn't have no need for it. So just like that there, drivin' by hand could be wiped clean out for generations on down the line. After a good while, would anybody even know how to drive no more? Driverless cars are somethin' that belongs to the future, but are they really all that better for us folks? Not necessarily, I'll tell you that. Though, there's just about as many good things to be said about it as there is bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

REWRITE

Automobiles are to blame for a right good amount of pollution on this here planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions over yonder in Europe and up to fifty percent in some car-heavy areas in the United States. Greenhouse gas is slowly chippin away at the Earth's ozone layer and if that ozone layer was to go away, human life itself'll start to go away right along with it. So it'd probably be real smart to limit car usage on every continent and in the big industrialized areas so we can help put a stop to the destruction of the ozone. Or at the very least slow it on down so the young'uns to come got a stable place to live in rather than havin to wear some kinda gas mask or philter over their faces just to breathe, like them folks over in Beijing, China has to do.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

REWRITE

Every one of them prior missions was unmanned, and there was a right good reason for that, seen as how ain't no spacecraft could survive more than a few hours out yonder. Most of the atmosphere is carbon dioxide, near about 97 percent of the whole atmosphere is carbon dioxide. What makes it even more troublesome is them clouds that contain real corrosive sulfuric acid, which is also a-sittin up there in the atmosphere. The temperature alone'd kill a person right on the spot. The temperature is 800 degrees Fahrenheit, and the atmospheric pressure is 90 times greater than what we ain't never experienced on our planet. So even though Venus is a right fine interestin planet, it can be a dangerous one too on account of the misleadin name, the planet bein considered Earth's twin, and the atmosphere bein outrageously different than what we got here on Earth.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason we's given fer this here is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author don't even clarify how this here is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that there sentence alone there is still some uneasiness since it ain't sure nor confirmed that Venus was once like Earth. Therefore, this here is why the author of "The Challenge of Exploring Venus" don't support the idea of studyin Venus real clearly. The lack of pros and benifits to our planet addin to the pot of cons and uncertainty that was instead made from readin this here article.

There have been many weird things in space that we could never figure out. Some of those things are just normal stuff that happens in space and some people don't know that happens. It could've just been a normal thing that happen and everyone thinks it's a big piece of information of aliens. People make hypothesis way to quickly based off of what they've seen and heard. Not all things are true. No one has truly seen an alien before and if there were aliens shouldn't have people already have seen one? Earth has been around for a long time and nobody has seen and alien life form.

REWRITE

They done been a whole heap of strange things up yonder in space that we just cain't never figure out. Some of them things is just regular ol' stuff that goes on up in space and some folks jest don't know it happens. It could've just been a plain ol' normal thing that happened and ever'body goes and thinks it's some big ol' piece of information about aliens. People go and make hypotheses way too quick-like based off of what they done seen and heard. Not all things is true. Ain't nobody truly laid eyes on an alien before and if there was aliens, shouldn't folks have already gone and seen one by now? This here Earth has been around for a right long time and ain't nobody seen no alien life form.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

REWRITE

The mood in thar memoir is real adventorous. In the memoir it showed how Narciso's folks and kinfolk up and moved. At first Narciso was a-livin in a furnished one-room apartment, then they got to where they could afford to move on into a modest three-room apartment that was fixin to be Narciso's home afore long. Narciso was borned in 1961, over in the Ironbound section of Newark, New Jersey. Narciso growed up with his family for a spell. "Family" didn't have a dadgum thing to do with bein blood kin. Narciso will always be grateful and lovin towards his mama and daddy for what all they done for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offened someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

REWRITE

My reckon is no 'cause you ain't gonna wanna deal with that many folks over one or two, maybe even five books. I ain't sayin' that people don't get offended by somethings that books and movies say but, you're gonna have a whole lot more than just one person come on in and say that there are more than just one book or movie. So then there wouldn't be no books left a'tall. What if you got somebody come in and they's requestin' that they want a certain movie and you go and say '@CAPS4, I'm awful sorry but we had to take that there movie off the shelf on account of it offened somebody.' I got a feelin' that person ain't gonna be none too happy and you're gonna have yourself some explainin' to do.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

REWRITE

@CAPS1 and me walked on down to the bank and just stood there a-starin' at the water. @CAPS1 went and asked me did I want to hear a joke, and after a spell I said yeah, go on ahead. The joke @CAPS1 told me ain't really fit to be repeated but it got me to laughin' so hard I near about couldn't catch my breath. His timin' was something else and it lifted my spirits somethin' fierce. I reckon I've always gone to my friends when I was feelin' low. And they've always been right there, provin' I can count on 'em. That day had been a plumb disaster, but the rest of the night turned out to be a whole lot better than I'd reckoned on. It ain't just that my friends can lift my spirits, but it matters a right smart that they can get me to laughin' too.

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

REWRITE

When you're a-ridin' in the car, we always want to make sure we get on to where we're headed without no trouble. Car wrecks don't happen all that often to folks, but it ain't altogether uncommon neither. The features on them driverless cars'll make sure you're safe whilst you're a-drivin' at all times. A whole heap of folks still text and drive, and that there's a big worry out on the road for you and for ever'body else that's drivin' too. When you got yourself one of them driverless cars, you can go on and do what you need to do, and that there includes sendin' a text. You'll have less of a risk of gettin' yourself into a wreck. Even though the one that ain't really drivin' won't have to put their hands on the wheel on account of the car doin' all the work, that driver's still got to keep their mind fixed on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

REWRITE

Another reason is, @CAPS1 I go on up to the library I reckon I oughta be able to get the book I'm a-wantin to read, not what other folks take a shine to. One time I went on down to the library and I was a-lookin for a romantic book to read and I couldn't find it nowhere. So I went on up and asked the lady there at the counter and she said they ain't got it no more, and I asked her why and she told me some lady reckoned it weren't fittin for young'uns to be readin. In my opinion, maybe that lady didn't even care none for romantic books herself. They oughtn't go and do somethin just on account of what one person believes. The next reason is, the library went and put that there movie or book up on the shelf in the first place on account of they figured folks'd enjoy it.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have a suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

REWRITE

I would be against the development of theses cars, doncha know, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it, ya know. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong, you betcha.

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

REWRITE

The author wraps up the end of the story the way he/she did on account of it shows just how much that plant really means and everything. S'aeng is gonna go ahead and wait till that flower blooms because it means so much to her and all. The flower represents her and her driving test, don'tcha know. When the hibiscus is all set to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance and whatnot. The last paragraph helps the reader realize just how much the plant means to the girl, its significance and everything. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test, you know what I mean.

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus budding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

REWRITE

Saeng has been through a real tough deal, what with losin family and havin to up and move to a whole different world and everything. That paragraph there is symbolic of turnin over a new leaf and startin fresh, doncha know. The snow meltin and the hibiscus buddin are both symbolizin new life and all that. Saeng is gonna have herself a new outlook on life and accept her situation so she can make the best of it. Also, the author says the winter hibiscus was in the ground now, and that there does compare to Saengs new found outlook planted on life. Like the flower and whatnot, a seed of hope was planted into Saeng, and now she is good and ready to blossom.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is real unfair on account of the presidential candidates or a party's central committee can go ahead and pick the electors and that there could cause em to vote unaccording to the majority vote. The most worrying thing is the prospect of a tie in the electoral vote. In that case, the election would get thrown over to the House of Representatives, where state delegations go and vote on the president. Because each state only gets one vote, the single representative from Wyoming would have just as much say as all 55 representatives from California. Most states have a "winner-take-all" system which could real easily throw off the vote and make it swing in the wrong direction and so then, against the voters popular vote. That there makes the electoral college irrational. And lastly, the electoral college is just plain unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

In conclusion, not only is it more intersting to say that there is a car that can self-drive itself, these cars are safer, more efficient, and are more able to create a system similar to taxes or busses. It helps the environment, it helps the needing families, and it helps in the case of a dangerous situation.

REWRITE

In conclusion, not only is it more intersting to say that there is a car that can self-drive itself, these cars are safer, more efficient, and are more able to create a system similar to like taxes or busses, doncha know. It helps the environment, it helps the needing families, and it helps in the case of a dangerous situation, you betcha.

My next reason that you should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. Im very grateul that I had the opportunity to participate in this program. It relly opened up the world to me. I learned that people in other countries need help during times of war. My final reason that you should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three time a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable bit it kept me very busy during those long days at sea.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

REWRITE

Cars are to blame for a whole heck of a lot of pollution on this planet, don'tcha know. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-heavy areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to go ahead and limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face just to breathe, like Beijing, China's population has to.

The only reason we are given for this is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benefits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

REWRITE

If someone is riding in a driverless car, and the car crashes, the manufacturers oughta be the ones to blame unless they go ahead and develop a technology to let the humans take complete control if necessary. Shoot, a whole lot of arguments could be made that the manufacturer didn't program the car right and that is why the person got injured or even so much as killed. This could end up with manufacturers of big companies paying millions, maybe even billions of dollars in law suits, doncha know. Driverless cars could cause a whole lot more accidents because there isn't somebody physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life, for crying out loud?

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

REWRITE

@CAPS1 and I walked on down to the bank and stood there just staring out at the water. @CAPS1 then went ahead and asked if I wanted to hear a joke, and after a pause I said yeah, sure. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was just something else and it made my mood soar. I have always turned to my friends whenever I felt down. And there have always been there proving I can count on them, doncha know. That day had been a real disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also real important that they make me laugh.

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

REWRITE

When you are in the car, you always want to make sure you get to where you are going without any problems, don'tcha know. Car accidents don't happen real often to people, but it is also not entirely rare either. The features of the driverless car will make sure things are safe while driving at all times. A whole lot of people still text and drive, which is a real big concern while out on the road for you and for others driving around too. When you have yourself a driverless car, you can go ahead and do what you need to do, and that includes sending a text. You will have less of a risk of getting into an accident. Even though the "non-driving driver" won't actually have to put their hands on the wheel on account of the car doing all the work, the driver still has to go ahead and keep focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

The builders had many obstacles while building the Empire State building. They had competition with the Chrysler building because of it's height. Al Smith, the constructor of the Empire State wanted to build the tallest and most famous building in the world. He made the buildings seem invincible. He even put a mooring mast on it so things could land on it. But it was never supposed to serve that purpose, It was only created for publicity. Because about the mooring mast the building would have failed to become popular. Al Smith did everything to make that building what it is today and it is still standing in New York city today.

REWRITE

The builduhs had many obstacles whilst buildin the Empire State buildin. They had competition with the Chryslah buildin because of it's height. Al Smith, the constructah of the Empire State wanted to build the tallest and most famous buildin in the whole world. He made the buildings seem invincible. He even put a moorin mast on it so things could land on it. But it was nevah supposed to serve that purpose, It was only created for publicity. Because about the moorin mast the buildin would have failed to become populah. Al Smith did everything to make that buildin what it is today and it is still standin in New Yawk city today.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electaral college is wicked biased because the presidential candidates or a pahty's central committee can pick the electas which might cause 'em to vote against what the majority voted fah. The most worryin' thing is the prospect of a tie in the electaral vote. In that case, the election would get thrown ovah to the House of Representatives, wheah state delegations vote on the president. Because each state only gets one vote, the single representatave from Wyoming would have just as much say as the 55 representataves from Califohnia. Most states got a "winnah-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the votahs popular vote. This makes the electaral college irrational. Lastly, the electaral college is just plain unfaiah.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

REWRITE

Caahs are to blame fah a lahge amount of pollution on this planet. Passengah cahs are responsible fah twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some cah-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layah and if the ozone layah went away human life itself will soon staht to go away. So it will probably be smaaht to limit cah usage in every continent and majah industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter ovah their face to breathe, like Beijing, China's population has to.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

REWRITE

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

The electoral college is real biased on account of the presidential candidates or a party's central committee bein able to pick the electors which may cause em to vote unaccording to the majority vote. The most worryin thing is the prospect of a tie in the electoral vote. In that case, the election would get thrown to the House of Representatives, where state delegations vote on the president. Cause each state only gets one vote, the single representative from Wyoming would have just as much say as the 55 representatives from California. Most states got a "winner-take-all" system which could real easy throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college plumb irrational. Lastly, the electoral college is just plain unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

Lastly, computers have made a lot of people when people got to Too many people a major view when it comes to family and friends. Although computers are an easy way to communicate to people, they should not be the only thing you use to talk to friends and family. So as you can see, computers are causing us to lead on-healthy lives because our priorities on health are why to low. They also keep you from enjoying life, to the fullest and can separate you from friends and family when not controlled. I am positive that I have persuaded you not to spend so much time on a computer. So next time you are using a computers, think of all the things you are missing out in life!

REWRITE

Last of all, computers have made a lot of people when people got to Too many people a major view when it comes to family and friends. Although computers are an easy way to communicate to people, they should not be the only thing you use to talk to friends and family. So as you can see, computers are causing us to lead on-healthy lives because our priorities on health are why to low. They also keep you from enjoying life, to the fullest and can separate you from friends and family when not controlled. I am positive that I have persuaded you not to spend so much time on a computer. So next time you are using a computers, think of all the things you are missing out in life!

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

REWRITE

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

REWRITE

The setting hit that cyclist real hard. He didn't have a drop of water and he was riding through the high deserts of California in June. Them deserts and no water could've been life-or-death for him, makin' him stressed out and thirsty as all get out. Throw in the fact that he was bikin' on top of all that, and shoot, you got yourself a dehydrated fella out in the desert! When he was somewhere between that ghost town and the bait shop he says, There was no one in sight, not a building, car, or structure of any kind, That right there would make any cyclist figure there ain't a whole lotta hope for survivin' if he went and passed out. Them California deserts'll do a number on any cyclist somethin' fierce, especially one ridin' without water like the fella in this story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offended someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.
