#### ANCHOR

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

#### REWRITE

Dear local Newspaper, I feel like computers been havin' a bad effect on folks of all ages. In my opinion, stayin' on the computer all day means you might miss out on outdoor activities. And if you sittin' on a chair all day, for real, what's gonna happen to you? You gon' get less active. From what I seen, when you get into computer games, they can get real addictive. Computers put negative effects on folks of all ages, and I think we oughta stop and think 'bout what we doin'. Most likely if you stay on the computer all day, you gon' miss out on things like sports.

#### ANCHOR

People are spending too much time on their computers and are spending less time exercising, enjoying nature, and interacting with family and friends. These people are spending hours and hours in front of a computer getting heavier every day. They start to eat their feelings because of how lonely they are. This process continues until the certain person can barely get out of their chair. Obesity is not the only problem that is damaging their health, their eyes are being damaged also. It is obvious that more & more people are having problems with @CAPS2 eyes everyday. Computers are making this happen. When a certain person is on the computer for only an hour, they are damaging their eyes tremendously.

#### REWRITE

Folks spendin' way too much time on they computers, not enough time workin' out, enjoyin' nature, and kickin' it with they fam and friends. People just sittin' for hours, gettin' bigger by the day. They start eatin' they feelings 'cause they so lonely. This keeps on till they can barely get up from they chair. But it ain't just about obesity messin' with they health, they eyes catchin' hell too. It's clear more folks havin' eye problems all the time. Computers makin' this happen. Even just one hour on the computer and they eyes takin' a big hit.

#### ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

#### REWRITE

In the story "The Mooring Mast" by Marcia Amidon, the folks buildin' the Empire State Buildin' ran into a problem tryin' to make a dock for dirigibles. One of the issues they had was they ain't have a proper landin' spot. In paragraph six, it said they could only let dirigibles tie down there for a few hours. They also realized most dirigibles comin' from other countries used hydrogen instead of helium, which was more flammable. In paragraph thirteen, they mentioned an accident could have been worse if it happened over a crowded place like downtown New York.

#### ANCHOR

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

#### REWRITE

Nah, I don't think that should happen, that'd be dumb and I'm sure a lotta folks gon' disagree with it. One reason is 'cause adults like all that stuff. And if they doin' this 'cause kids keep gettin' into it, then just get a door that says @NUM1 and older and put cameras up. If kids' parents complain, then at least you can say it's all in one room and no kids allowed. This shouldn't be a big deal—if you a kid, you gon' have to be 'round it all the time when you grow up. So you might as well get used to it. It's a big deal if you cussin' all the time, but most kids know better and know not to do bad stuff.

#### ANCHOR

I would be against the development of theses cars, just for the fact if you have no control over the car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

#### REWRITE

I ain't down with makin' these cars, 'cause if you ain't got no control over the car, it could crash more than a car with a person drivin' it. Like what if a car 'bout to get in an accident and you can't even turn it to stop it from crashin'? I think it'd be better if we kept drivin' ourselves and not let some system in the car run things. Sure, we had them Google cars drivin' on they own since 2009, where they can drive over half a million miles without crashin', but still, them Google cars ain't fully driverless since the car gotta alert the driver to take over if somethin' go wrong.

#### ANCHOR

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

#### REWRITE

The author wraps up the story like that 'cause it shows just how much the plant really means. S'aeng gonna wait till the flower blooms 'cause it means a lot to her. The flower represents her and her driving test. When the hibiscus ready to bloom, she gonna be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last part helps the reader see just how much the plant means to the girl, its significance. It makes her feel more at home, and her home feels less strange; makes her joyful and happy after the misery of failing the driving test.

#### ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

#### REWRITE

The electoral college got some real bias 'cause the presidential candidates or a party's central committee can pick electors, makin' it so they might not vote with the majority. What's really worryin' is a tie in the electoral vote. If that happens, the election goes to the House of Representatives, where state delegations decide on the president. Each state just gets one vote, so one person from Wyoming got as much say as the 55 from California. Most states do a "winner-take-all" thing, which could mess up the vote and make it go the wrong way, not with the popular vote. This makes the electoral college not make much sense. In the end, the electoral college just ain't fair.

#### ANCHOR

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

#### REWRITE

a whole lotta obstacles got faced while tryna get the Empire State Building to let dirigibles dock there. This was a long, hard, well-thought process. Workers couldn't just slap a mooring mast on top of the building's roof. A thousand-foot dirigible moored at the top of the building, just hangin' by a single cable tether, which put stress on the building's frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that lit up from inside, with a stepped-back design imitatin' the overall shape of the building. Later on, they figured out dirigibles couldn't moor at the Empire State Building. One reason bein' a law against airships flyin' too low over urban areas. Architects went through a whole lotta struggles buildin' masts.

#### ANCHOR

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

#### REWRITE

One reason I think the Electoral College actually works is ‘cause it’s all about pickin’ them electors who vote for President and Vice President, then Congress countin’ them votes. The Electoral College help choose the president and vice president, and without it, it’d be total chaos ‘cause the Electoral College make it easier and faster, a better process. The Electoral College got all them electors and votes, which is real important ‘cause under the 23rd Amendment of the Constitution, D.C. get 3 electors and treated like a state for the Electoral College. So when we talk about states, we includin’ D.C. too.

#### ANCHOR

In the excerpt "The Mooring Mast" by @ORGANIZATION2, the builders of the Empire State Building faced some obstacles in attempting to allow dirigibles to dock there. Although this sounded like a great idea and seemed possible at first, it was not. The idea of the mooring mast of the @CAPS1 State Building was neither practical nor safe. In paragraph fourteen, Marcia states why this dirigible idea wasn't so safe. "The winds on top of the building were constantly shifting due to violent air currents. In the last sentence of paragraph fourteen, the author states another reason the idea wasn't safe nor practical. "they would be dangling high above pedestrians on the street,"

#### REWRITE

In the excerpt "The Mooring Mast" by @ORGANIZATION2, the folks buildin' the Empire State Building ran into some troubles tryna let dirigibles dock there. Even though it sounded like a cool idea and seemed doable at first, it just wasn't. The idea of the mooring mast on the @CAPS1 State Building wasn't practical or safe. In paragraph fourteen, Marcia explains why this dirigible idea wasn't safe. "The winds up top of the building was always shiftin' 'cause of crazy air currents. In the last sentence of paragraph fourteen, the author mentions another reason why it wasn't safe or practical. "they would be danglin' high above folks on the street,

#### ANCHOR

The mood created by the author in the memoir is nice, and calm. It describes How the famialy let people in their house with open arms and a open door and that makes me and mybe other people seem the mood is nice. The mood is calm because it talks about this famialy doing nice thing and there is no yelling no fighting and I find the to be nice, and calm.

#### REWRITE

The mood the author's set in the memoir real chill and laid-back. Talkin' 'bout how the family be lettin' folks in they house with open arms and an open door, that make me and maybe other folks feel the vibe is nice. It's calm 'cause it talk 'bout this family doin' good stuff, ain't no yellin', no fightin', and I find that to be real nice and calm.

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

#### ANCHOR

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

#### REWRITE

Driverless cars ain't really driverless and might even bring more problems on the road. One downside is eventually the skill to drive a car could fade away. Like, if you took a one-year-old baby and cooked and fed 'em till they was eighteen, would they know how to cook? Even if they watched you, they couldn't cook like you 'cause they never learned the skill. It wasn't needed. So just like that, manual driving could disappear for generations. Eventually, would anybody know how to drive? Driverless cars part of the future, but is they really better for us? Not necessarily. There's just as many good things as there are bad.

#### ANCHOR

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

#### REWRITE

Cars be causin' a whole lotta pollution on this planet. Passenger cars make up 'bout twelve percent of greenhouse gas emissions in Europe, and in some car-heavy spots in the U.S., it's up to fifty percent. Greenhouse gas is wearin' down the Earth's ozone layer, and if that ozone layer disappear, human life gon' start disappearin' too. So it might be smart to cut down on car usage everywhere, especially in major industrial areas, so we can help stop messin' up the ozone. Or at least slow it down, so future generations got a stable place to live instead of needin' to wear a gas mask or filter just to breathe, like in Beijing, where folks gotta do that.

#### ANCHOR

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

#### REWRITE

All them missions before ain't had nobody on 'em, and that made sense 'cause no spaceship could last more than a few hours there. Most of the air is carbon dioxide, like 97 percent of it is carbon dioxide. What's even tougher is them clouds got some serious corrosive sulfuric acid, which is also in the air. The heat by itself would take a person out soon as they touch it. It's 800 degrees Fahrenheit, and the pressure is 90 times stronger than anything we deal with on our planet. So even though Venus sound cool, it's real dangerous too 'cause of that tricky name, folk callin' it Earth's twin, and the atmosphere bein' so different from what we got here on Earth.

The bill on a computer up outer a while and people don't realize that when they payin' for the internet, they ain't gettin' a lot of what the cable com say they givin' you. Not everybody know how to use a computer like older folks don't really know how to use the full potential of a computer. Cause they never learned how to use computer. In this, the computer ain't a huge help for our society. 'Cause of the time and the cost and the knowledge on computers.

#### ANCHOR

But it shouldn't get to the point where people can just remove books from the shelf at their own free will. Without some limit on censorship in a library, absolutely anything could be found there. When we think of a library we don't think of things that are offensive. People view the library as a positive place, created for people's own personal enjoyment. That doesn't mean that we will never find something that @DATE2 offend us in some way there, but people should not be able to just remove books from the shelf because they don't agree with their morals. @CAPS2 is different, and nobody has the right to tell them what exactly is right or wrong, up to a certain point.

#### REWRITE

But it ain't supposed to get to where folks can just take books off the shelf whenever they feel like it. Without some kinda limit on censorship in a library, anything could end up there. When we think 'bout a library, we ain't thinkin' 'bout stuff that's offensive. Folks see the library as a good place, made for folks' own personal enjoyment. That don't mean we won't ever find somethin' there that might offend us somehow, but folks shouldn't be able to just take books off the shelf 'cause they don't line up with their morals. Everybody different, and ain't nobody got the right to say what's exactly right or wrong, up to a certain point.

#### ANCHOR

In conclusion I think that if a book is on a shelf, the book should be taken off if found offensive. There fighting for a book and you don't want that. The libraries needs more than one copy of a book, so they will not fight over it. If the libraries don't have copies of a book it will create problems. So, think before you act. It can be found offensive at time. Sincerely,  
@PERSON1

#### REWRITE

So, basically, I'm sayin' if a book up on a shelf and folks find it offensive, it oughta come down. Ain't nobody tryna fight over a book, naw. Libraries need more than one copy so folks don't gotta scrap about it. If libraries ain't got enough copies, that's gon' cause problems. So, think 'fore you do somethin'. It might offend folks sometimes. Sincerely,  
@PERSON1

#### ANCHOR

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

#### REWRITE

The only reason we get for this is that "Astronomers are fascinated by Venus 'cause it mighta once been the most Earth-like planet in our solar system," (TCEV). The author don't even explain how this matters to us today. What's to gain from a planet that "mighta once been the most Earth-like planet in our solar system?" That sentence still got folks uneasy 'cause it ain't sure or confirmed Venus was ever like Earth. That's why the author of "The Challenge of Exploring Venus" don't make a strong case for why we should study Venus. The lack of pros and benefits to our planet just add to the cons and uncertainty we got from this article.

#### ANCHOR

Also, the number one and two things that get most people in wrecks, texting and drinking. People do not have to worry about a driverless care texting someone back or on the phone looking at social media.

Driverless cares do not get distracted. People also will not see a driverless car in a bar getting drunk. It just will not happen. The driverless cars will not be pulled over for being intoxicated or swerving because they will not be intoxicated and will be driving safely. Now some people are going to argue and say, "These really aren't driverless cars, you still have to drive them." Yes, they are true, as of now. But people should be fine with having to take the wheel sometimes.

#### REWRITE

Also, the top two things that got folks in wrecks, texting and drinking. Folks ain't gotta worry about a driverless car texting someone back or on the phone scrollin' through social media. Driverless cars don't get distracted. You ain't gonna see a driverless car in a bar getting drunk. It just won't happen. Driverless cars ain't gettin' pulled over for bein' intoxicated or swervin' 'cause they ain't gonna be intoxicated and they gonna be drivin' safely. Now some folks gon' argue and say, "These really ain't driverless cars, you still gotta drive 'em." Yeah, that's true, for now. But folks should be cool with takin' the wheel sometimes.

#### ANCHOR

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

#### REWRITE

My last point is that computers be real helpful for businesses. When files get lost or misplaced, folks can use the computer to pull up the backup file. When they gotta order supplies, most times they just hit up a website and order online. And when updates come up 'bout new events in the company, an email get sent out, and you find it on a computer. Lot of folks think people overuse their computers, but that's on the users, not us. We gotta decide how long we using them computers. Plenty jobs wouldn't even be possible without computers. It's not 'bout using them too much, it's about how you use 'em. So I say computers are good and real useful when used right.

#### ANCHOR

The author concludes with this paragraph to show her determination. When she says,        when the snows melt and the geese return and his hibiscus is budding, then I will take that test again.        Saeng is explaining how the geese have the determination to fly back and that the hibiscus has the determination to bud again so why shouldn't she have the determination and confidence to take the test again. Saeng said,        I-I failed the test.        It seems as if failing the driving test made her feel like she was going to fail in the new country. But after she saw the geese's and hibiscus's determination through harsh conditions, she was determined to try the test again.

#### REWRITE

The author wraps it up showin' her resolve. When she says, "...when the snows melt and the geese come back and his hibiscus startin' to bud, then I'll take that test again." Saeng talkin' 'bout how the geese got that drive to fly back and the hibiscus got that drive to bud again, so why shouldn't she have the same drive and confidence to try that test again. Saeng was like, "I-I failed the test." Look like failin' the drivin' test made her feel like she might mess up in the new country. But seein' the geese's and hibiscus's grit through tough times, she was set on takin' that test once more.

#### ANCHOR

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

#### REWRITE

The setting really got to the cyclist. He ain't had no water and he was out there rollin' through the high deserts of California in June. Bein' in the desert with no water coulda been life or death for him, makin' him stressed and thirsty. Add him pedalin' on that bike, and you got a man straight up dehydrated in the desert! When he was between the ghost town and the bait shop, he said, wasn't nobody in sight, not a building, car, or structure nowhere. This got him thinkin' there ain't no hope for survival if he passed out. The deserts of California really hit a cyclist hard, especially when they ain't got no water, like him in the story.

#### ANCHOR

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

#### REWRITE

The mood in the memoir real adventorous. In the memoir it showed how Narciso's parent's and kinfolk moved. First off, Narciso was livin' in a furnished one-room apartment, then they managed to get a modest three-room apartment that was 'bout to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his folks for a while. "Family" wasn't just 'bout bein' blood. Narciso always gonna be grateful and lovin' to his parents for what they did for him.

#### ANCHOR

People are spending too much time on their computers and are spending less time exercising, enjoying nature, and interacting with family and friends. These people are spending hours and hours in front of a computer getting heavier every day. They start to eat their feelings because of how lonely they are. This process continues until the certain person can barely get out of their chair. Obesity is not the only problem that is damaging their health, their eyes are being damaged also. It is obvious that more & more people are having problems with @CAPS2 eyes everyday. Computers are making this happen. When a certain person is on the computer for only an hour, they are damaging their eyes tremendously.

#### REWRITE

Folks are spendin' too much time on their computers and spendin' less time exercisin', enjoyin' nature, and interactin' with kin and friends. These folks are spendin' hours and hours in front of a computer gettin' heavier every day. They start to eat their feelings 'cause of how lonely they are. This process keeps on 'til that certain person can barely get outta their chair. Obesity ain't the only problem that's hurtin' their health, their eyes are gettin' damaged too. It's clear more & more folks are havin' problems with @CAPS2 eyes every day. Computers are makin' this happen. When a certain person is on the computer for just an hour, they're hurtin' their eyes somethin' awful.

#### ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

#### REWRITE

In the story "The Mooring Mast" by Marcia Amidon @CAPS1, the folks buildin' the Empire State Building ran into a hitch tryin' to set up a dock for dirigibles. One of the troubles they had was not havin' a suitable landin' area. In paragraph six, it mentioned that it would only let dirigibles anchor there for a few hours. They also came to realize that most dirigibles comin' in from overseas were usin' hydrogen instead of helium, which was way more flammable. In paragraph thirteen, they said an accident could've been a whole lot worse if it happened over a packed area like downtown New York.

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

#### REWRITE

No, I don't think that oughta happen. That'd be just plain dumb, and I'm sure a lotta folks would disagree with it. One reason is 'cause adults like all of that stuff. And if they're doin' this 'cause kids keep gettin' into 'em, then just get a door that says 21 and older and put up some cameras. If kids' parents complain, then at least you can say it's all in one room and no kids allowed. This shouldn't be a big deal. If you're a kid, you're gonna have to be around it all the time when you grow up. So you might as well get used to it. It is a big deal if you're cussin' all the time, but most kids know better and know not to do bad stuff.

#### ANCHOR

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

#### REWRITE

I'd be against the development of these cars, just 'cause if you ain't got control over the car, it might crash more likely than a car a person is drivin', 'cause what happens if a car's fixin' to have a wreck and you can't turn it to keep from crashin'? I reckon it'd be better if us folks took the wheel ourselves instead of relyin' on some system in the vehicle that does the drivin'. Sure, we've had them Google cars that can drive on their own under certain conditions since 'bout 2009, where they can go over half a million miles without crashin', but even then the Google car ain't truly driverless 'cause it'll still have to let the driver know to take over if somethin' goes wrong.

#### ANCHOR

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

#### REWRITE

The author wraps up the story just like they did 'cause it shows just how much the plant truly matters. S'aeng's fixin' to wait till that flower blooms 'cause it means the world to her. The flower stands for her and her drivin' test. When the hibiscus is ready to blossom, she'll be all set to drive. That plant gives her hope for a new tomorrow, a fresh shot. The last paragraph helps folks see just how much the plant means to the girl, its importance. It makes her feel more at home, and her home feels stranger; it brings her joy and happiness after the heartache of failin' the drivin' test.

#### ANCHOR

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

#### REWRITE

Saeng's been through a heartbreaking loss in her family and had to move to a whole different world. This part's all about turning over a new leaf and starting fresh. The "snows melting" and "hibiscus bidding" both mean starting new. Saeng's fixing to have a new outlook on life and make peace with her situation to make the best of it. The author mentions "the winter hibiscus was in the ground now," comparing it to Saeng's newfound perspective planted on life. Just like that flower, a seed of hope's been planted in Saeng, and she's ready to blossom.

#### ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

#### REWRITE

The electoral college is real biased 'cause the presidential candidates or a party's central committee can pick the electors, which might make 'em vote not in line with the majority vote. What's most worryin' is the chance of a tie in the electoral vote. If that happens, the election goes to the House of Representatives, where state delegations vote on the president. Since each state only gets one vote, the lone representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system that could easily mess up the vote and make it swing the wrong way and thus, against the voters' popular vote. This makes the electoral college irrational. Lastly, the electoral college just ain't fair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

#### REWRITE

I dont really know why wold they need smarter cars then we already need that would just make everything diffrent more then its alrady is why cant they just make other things that the world really needs . for example bulldings for those that dont have an home,or are living under briges. why cant they make hospitals in other places were thy need them insted of cars that are smart how are they gonna help us we alredy have cars that can transport us why cant they use that technology to make the world better bye making smart cars is not gonna make it better some people are not even gonna be able to buy them because of how expensive they are going to be,how are the rest goona get them ,with what money are they going to buys them.

#### REWRITE

I don't really know why they'd need smarter cars than we already got. That'd just make everything different more than it already is. Why can't they just make things the world really needs? Like buildin's for folks that don't have a home or are livin' under bridges. Why can't they make hospitals in places where they need 'em instead of smart cars? How are they gonna help us? We already got cars that can get us where we need to go. Why can't they use that technology to make the world better? Makin' smart cars ain't gonna fix things. Some folks won't even be able to buy 'em 'cause of how expensive they'll be. How are the rest gonna get 'em, and with what money are they gonna buy 'em?

#### ANCHOR

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

#### REWRITE

Automobiles are the culprit for a heap of pollution on this here planet. Passenger cars cause about twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-heavy parts in the United States. Greenhouse gas is slowly gnawin' away at Earth's ozone layer, and if it disappeared, human life itself might start to vanish. So it'd likely be wise to cut back on car usage all over the continents and major industrial areas to help stop the tearing up of the ozone. Or at the very least, slow it down so the future generations have a stable place to live in instead of havin' to wear some kind of gas mask or filter over their face to breathe, like folks in Beijing, China's gotta do.

#### ANCHOR

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

#### REWRITE

All the previous missions were unmanned, and there's a good reason for that, 'cause no spacecraft could last more than a few hours there. Most of the atmosphere's carbon dioxide, almost 97 percent. What's even tougher are the clouds full of that highly corrosive sulfuric acid, also in the atmosphere. The heat alone would kill a person right away. It's 800 degrees Fahrenheit, and the atmospheric pressure's 90 times more than what we've ever felt here on our planet. So even though Venus is a pretty nifty planet, it can be a dangerous one too, 'cause of the misleadin' name, it bein' considered Earth's twin, and the atmosphere bein' crazily different than ours here on Earth.

The mood of the memoir is gracious. Rodriguez is grateful for many things listed in this memoir. In paragraph @NUM1, @CAPS2 says @CAPS2 is grateful for his inheritance of the cuban culinary gift. In @CAPS1 @NUM2, by saying "My mother and father had come to this country with such courage, without any knowledge of the language or the culture. They came selflessly, as many immigrants do, to give their children a better life." @CAPS2 shows his gratitude for his parents moved to @LOCATION1. In paragraph @NUM3 @CAPS2 shows his gratitude for his parents love in the quote "I will always be grateful to my parents for their love and sacrifice." Rodriguez is also grateful for the love and hapiness of the home.

#### REWRITE

The mood of the memoir is right gracious. Rodriguez is thankful for a lot of things mentioned in this memoir. In paragraph @NUM1, @CAPS2 says @CAPS2 is thankful for his inheritance of the Cuban culinary gift. In @CAPS1 @NUM2, by sayin' "My mother and father had come to this country with such courage, without any knowledge of the language or the culture. They came selflessly, as many immigrants do, to give their children a better life." @CAPS2 shows his gratitude for his parents movin' to @LOCATION1. In paragraph @NUM3 @CAPS2 shows his gratitude for his parents' love in the quote "I will always be grateful to my parents for their love and sacrifice." Rodriguez is also thankful for the love and happiness of the home.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

#### REWRITE

The only reason we're given for this is that "Astronomers are fascinated by Venus 'cause it may well have once been the most Earth-like planet in our solar system," (TCEV). The author don't even clarify how this matters to us today. What's there to gain from a planet that "may well have once been the most Earth-like planet in our solar system?" In that sentence alone, there's still some uneasiness since it ain't sure or confirmed that Venus was once like Earth. That's why the author of "The Challenge of Exploring Venus" don't support the idea of studying Venus all that clearly. The lack of pros and benefits to our planet just adds to the pot of cons and uncertainty that came from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

#### REWRITE

If someone's ridin' in the driverless car, and the car crashes, the manufacturers oughta be the ones to blame unless they come up with a way for folks to take complete control if needed. Many folks might argue that the manufacturer didn't program the car right, and that's why somebody got hurt or even killed. This could mean big companies payin' millions, maybe even billions, in lawsuits. Driverless cars could cause a whole lot more wrecks 'cause there ain't someone physically watchin' the car's surroundings, and technology as simple as calculators can mess up sometimes, so would you really trust a computer-run car with your life?

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

#### REWRITE

My last point would be that computers are a real big help for businesses. When files get lost or misplaced, the worker(s) can use the computer to pull up the back-up file. When they need to order supplies, most times they'll head to a website and order online. Or when updates are posted about upcoming events in that company, an email is sent out and found using a computer. Plenty of folks think people overuse their computers, but that's the user's fault, not ours. We should decide how long we're usin' them computers. Many jobs would be darn near impossible without computers. It ain't about overusing them; it's about how you use 'em. So, overall, I'd say computers are good and mighty useful when used in the right hands.

The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

#### REWRITE

The settin' affected the cyclist a whole lot. He didn't have no water and he was travelin' through the high deserts of California in June. Those deserts and no water coulda been life-or-death for him, makin' him stressed and mighty thirsty. Couple that with him pedalin', and you've got yourself a parched man in the desert! When he was between the ghost town and the bait shop, he says, "There wasn't a soul in sight, not a buildin', car, or structure of any kind." This would make the cyclist think there ain't no hope for his survival if he passed out. The deserts of California affect any cyclist a whole lot, especially one without water like the cyclist in the story.

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

#### ANCHOR

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offened someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

#### REWRITE

My guess is no 'cause you don't wanna deal with that many folks over one or two, maybe even five books. I ain't sayin' folks don't get offended by stuff that books and movies say, but you're gonna have a whole lot more than just one person comin' in and sayin' there's more than just one book or movie. So then there wouldn't be no books left. What if someone comes in and asks for a certain movie, and you say, "@CAPS4, I'm sorry, we had to take that movie off the shelf 'cause it offended someone." I reckon that person ain't gonna be happy, and you'll have some explainin' to do.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

#### REWRITE

@CAPS1 and I moseyed on down to the bank and stood there just gazin' at the water. @CAPS1 then asked if I wanted to hear a joke, and after a minute I said yes. The joke @CAPS1 told me probably ought not to be repeated, but it made me laugh so hard I could hardly breathe. His timing was spot on and it brightened my mood right up. I've always leaned on my friends when I felt blue. And they've always been there showin' I can count on 'em. That day had been a mess, but the rest of the night turned out way better than I'd hoped. It ain't just that my friends can lift my spirits, but it's real important that they make me laugh.

#### ANCHOR

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

#### REWRITE

I reckon I'd be agin the development of these cars, jest on account of if ya ain't got no control over the car, it'd be more likely to crash than a car a person is drivin', 'cause what if a car's fixin' to get in a wreck and ya can't steer it to keep it from crashin'. I reckon it'd be better if folks done the drivin' and not some contraption in the vehicle that does it fer ya. We mighta had them Google cars that can drive by theirselves under certain conditions since 2009, where they can go more'n half a million miles without wreckin', but even then the Google car ain't truly without a driver 'cause it'll still have to alert the driver to take over if somethin' goes haywire.

#### ANCHOR

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

#### REWRITE

The author wraps up the story the way they did cause it shows how much the plant truly means. S'aeng's gonna wait til the flower blooms cause it means so much to her. The flower stands for her and her drivin' test. When the hibiscus is ready to bloom, she'll be ready to drive. The plant gives her hope for a new tomorrow, a new chance. That last bit helps the reader see just how much the plant means to the girl, its importance. It makes her feel more at home, and her home makes her feel like a stranger; makes her joyful and happy after the misery of flunkin' the drivin' test.

### ANCHOR

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

### REWRITE

Saeng's had herself a heap o' sorrow with losin' family an' movin' to a whole new place. This here piece is all 'bout startin' over fresh. The way the snow's meltin' an' the hibiscus is comin' up, it's talkin' 'bout new beginnings. Saeng's fixin' to have a new outlook on life, ready to accept her situation and make the best of it. The author mentions "the winter hibiscus was in the ground now," likenin' it to Saeng's newfound outlook gettin' planted. Just like that flower, hope's been sowed in Saeng, an' she's ready to bloom.

#### ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

#### REWRITE

The electoral college is real biased 'cause the presidential candidates or a party's center committee kin pick the electors which might make 'em vote different from the majority vote. What's most worryin' is the chance of a tie in the electoral vote. In that case, the election would be tossed to the House of Representatives, where state delegations vote on the president. 'Cause each state only gets one vote, the single representative from Wyoming'd have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easy throw off the vote and make it swing in the wrong direction and thus, agin the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

#### REWRITE

A heap of hurdles was tackled tryin' to get the Empire State Buildin' to let them airships dock there. It was a long, tough, and well-thought-out process. Workers couldn't just plop a mooring mast on the top of the buildin's roof. A thousand-foot airship was moored at the top, held by a single cable tether, puttin' stress on the buildin's frame. The architects also had to put together a shiny glass and chrome-nickel stainless steel tower lit up from the inside, with a stepped-back design that mimicked the buildin's shape. Later on, they figured airships couldn't moor at the Empire State Buildin'. One reason was a law 'gainst airships flyin' too low over towns. Architects went through a lotta hurdles buildin' masts.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

#### REWRITE

Driverless cars ain't really driverless and might even stir up more trouble on the road. One downside is that eventually folks' ability to drive a car could just shrivel up and die off. Fer instance, if ya took a one year old baby and cooked fer and fed him till he was eighteen, would he be able to cook? Even if he watched ya cook, he ain't never gonna cook like you cause he ain't never learnt the skill. Weren't needed. So just like that, old-timey drivin' can be wiped out fer the ones yet to come. Eventually, would anyone know how to drive? Driverless cars are the way of the future, but are they really better fer us? Not necessarily. Though, there's just as many good things as there are bad.

Lastly, @CAPS2 away the advancing in computers maens that you are @CAPS2 away family and friends connectionds. Computers offer many sites such as facebook or myspace o connect with loved ones. You can also go on @CAPS3 or sype to chat or video chat with them. Yes, maybe computers are @CAPS2 away time with family but what about @CAPS4 or @CAPS5 in @LOCATION1 that you have at to in over a year? Don't you want some time them too? You can make time limts for yourself so that you don't spend your whole time on the computer. This way you can took to all of your loved ones would you want to be the one crushing the oceans of a child that wants to talk/ see his grandparents?

#### REWRITE

Lastly, them there advancin' in computers means that you're pullin' away family and friends connections. Computers offer many sites like Facebook or MySpace to connect with loved ones. You can also go on Zoom or Skype to chat or video chat with 'em. Sure, maybe computers are takin' time with family, but what about cousins or kin in some place you ain't been to in over a year? Don't ya want some time with them too? You can make time limits for yourself so ya don't spend your whole time on the computer. This way you can talk to all of your loved ones—would ya want to be the one crushin' the hopes of a young'un that wants to talk or see his grandparents?

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

#### REWRITE

Automobiles is ta blame fer a heap o' pollution on this here planet. Passenger cars is responsible fer twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive places in the United States. Greenhouse gas is eatin' away at Earth's ozone layer, and if that thar ozone layer goes, human life itself will soon start ta go, too. So it'd likely be smart ta cut back on car usage in all continents and big ol' industrialized areas so we can help stop the destroyin' of the ozone. Or at least slow it down so future generations have a stable place ta live, rather than wearin' some sort of gas mask or filter over their face ta breathe, like folks in Beijing, China have ta do.

#### ANCHOR

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

#### REWRITE

Each of the missions before was unmanned, an' that was fer good reason, seein' as no spacecraft could make it more'n a few hours there. Near 'bout all the air's carbon dioxide, 'bout 97 percent of it is. What's even trickier is them clouds holdin' strong sulfuric acid, which also float 'round in the air. The heat alone'd just up an' kill a person right on the spot. It's 800 degrees Fahrenheit, an' the air pressure's 'bout 90 times more'n what we're used to on our planet. So, even though Venus is a real interestin' planet, it's a dangerous one, too, 'cause of the misleadin' name, folks callin' it Earth's twin, an' the air bein' mighty different from ours here on Earth.

There have been many weird things in space that we could never figure out. Some of those things are just normal stuff that happens in space and some people don't know that happens. It could've just been a normal thing that happen and everyone thinks it's a big piece of information of aliens. People make hypothesis way to quickly based off of what they've seen and heard. Not all things are true. No one has truly seen an alien before and if there were aliens shouldn't have people already have seen one? Earth has been around for a long time and nobody has seen and alien life form.

#### REWRITE

There's been a heap of strange things in space we could never quite figger out. Some of 'em are just the usual stuff that happens up there, and some folks don't know it's happenin'. It coulda just been a normal thing that happened, and ever'one thinks it's a big ol' sign of aliens. People go on makin' guesses too quick-like based on what they've seen and heard. Not ever'thing's true. Ain't nobody really seen an alien before, and if there was aliens, wouldn't folks have seen one by now? Earth's been 'round a long time and nobody's seen any alien critters.

#### ANCHOR

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

#### REWRITE

If someone's ridin' in one of them driverless cars, an' it wrecks, it oughta be the manufacturers that take the blame 'less they come up with somethin' to let folks take the wheel if need be. Folks could argue the manufacturer didn't rightly program the car an' that's why the person got hurt or even worse, killed. This could end up with big companies havin' to fork over millions, maybe even billions, in lawsuits. Driverless cars could cause a heap more wrecks 'cause there ain't nobody watchin' the road round the car, and simple technology like calculators can mess up at times, so would ya really trust a car run by a computer with your life?

#### ANCHOR

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

#### REWRITE

In the memoir "Narciso Rodriguez", the mood the author put out was lovin', carin', and 'preciative. Lovin' is what they done most 'cause they basically called ever'body their family. Fer example, in paragraph @NUM1, it says, "My parents always kep' their arms and their door open to the many folks we call family, knowin' that they would do the same fer us". Another mood was carin', 'cause they wanted their young'uns to have a better life. An example is "My ma and pa had to come to this country with such courage, to give their young'uns a better life, leavin' their friends, families, and careers in the country they loved". This shows they care 'bout their kids. One last mood is 'preciative.

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

#### REWRITE

My last point'd be that computers are a big help fer businesses. When files git lost or misplaced, the worker(s) can use the computer an' bring up the back-up file. When they need to order supplies, most times they'll go to a website an' order online. Or when updates are posted about upcomin' events in that company, an e-mail is sent out an' is found usin' a computer. Many folks think people overuse their computers, but that's the users' fault not ours. We oughta choose how long we're usin' them computers. Many jobs would be impossible without computers. It ain't about overusin' 'em, it's about. So overall I say computers are good an' mighty useful when used in the right hands.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offended someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

#### REWRITE

My guess is no 'cause ya don't wanna deal with that many folks over one or two, maybe even five books. I ain't sayin' folks don't get riled up by somethin' books and movies say, but yer gonna have a lot more than just one person come in sayin' there's more than just one book or movie. So then there wouldn't be no books left. What if someone comes in and asks for a certain movie and you say, '@CAPS4, I'm sorry, we had to take that movie off the shelf 'cause it offended someone.' I reckon that person ain't gonna be happy, and you'll have some explainin' to do.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

#### REWRITE

Me and @CAPS1 moseyed on down to the bank and stood there just lookin' at the water. @CAPS1 then asked if I wanted to hear a joke, and after a spell I said yep. The joke @CAPS1 told me probably ought not be repeated but it had me laughin' so hard I couldn't catch my breath. His timin' was just right and it lifted my spirits. I always look to my friends when I'm feelin' low. And they've always been there, showin' I can count on 'em. That day had been a mess, but the rest of the night turned out better than I'd hoped. It ain't just that my friends can lift my mood, but it means a lot that they can make me laugh too.

#### ANCHOR

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

#### REWRITE

Them features of the place really got to the cyclist. One thing was how dry the land was. He'd been pedalin' so long he got plumb dehydrated, an' there weren't a drop of water in sight for who knows how long, an' he reckoned he couldn't make it much farther. Another thing about the place was the heat. Felt like he couldn't keep on goin' 'cause the sun was fryin' him like he was fixin' to have a heat stroke. Plain as day, them features sure did a number on the cyclist.

#### ANCHOR

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

#### REWRITE

When y'all are in the car, we always wanna make sure we git to where we're goin' without any fuss. Car wrecks don't happen too often to folks, but they ain't exactly rare neither. The way them driverless cars is set up will keep ya safe while drivin' all the time. A lotta folks still text and drive, which is a big worry when you're on the road for you and others drivin' too. When ya got a driverless car, you can do what ya need, includin' sendin' a text. You'll have less chance of gittin' into a wreck. Even though the "non-driving driver" ain't gotta put their hands on the wheel 'cause the car handles it all, the driver still needs to be payin' attention to the road.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

#### REWRITE

I'd be against the development of these cars, just 'cause if you can't control the car, it might crash more likely than one a person's driving. What happens if a car's about to get in an accident and you can't turn it to avoid the crash? I think it'd be better if we folks took control of driving instead of some system in the vehicle doin' it. Sure, we've had them Google cars drivin' on their own under certain conditions since 2009, with cars goin' over half a million miles without crashin', but still, the Google car ain't truly driverless since it has to alert the driver to take over if somethin' goes wrong.

In every paragraph in the memoir he explains how life was and how he loved it so much. In paragraph @NUM1 he uses parenthesis to show or talk about how much he loved different kinds of things. He shows in his writing all the warm kind of feelings he had as a child. In paragraphs three and four he also talks about how much he loved being with other cultures and how his parents were really good people, don'cha know.

#### ANCHOR

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

#### REWRITE

Saeng's been through a tough time with a big loss in the family and a move to a whole new world. This part's about starting fresh and trying something new. The "snows melting" and "hibiscus bidding" both show new life coming in. Saeng's gonna have a new outlook on life and accept where she's at to make the most of things. The author says "the winter hibiscus was in the ground now," which is like Saeng's new outlook on life being planted. Just like the flower, a seed of hope's been planted in Saeng, and now she's ready to grow.

#### ANCHOR

The builders had many obstacles while building the Empire State building. They had competition with the Chrysler building because of it's height. Al Smith, the constructor of the Empire State wanted to build the tallest and most famous building in the world. He made the buildings seem invincible. He even put a mooring mast on it so things could land on it. But it was never supposed to serve that purpose, it was only created for publicity. Because about the mooring mast the building would have failed to become popular. Al Smith did everything to make that building what it is today and it is still standing in New York city today.

#### REWRITE

The builders ran into lots of hurdles while putting up the Empire State Building. They had a bit of a rivalry with the Chrysler Building because of its height. Al Smith, who was in charge of the Empire State, wanted to create the tallest and most famous building around. He made the buildings seem invincible. He even added a mooring mast on it so things could dock on it. But it wasn't really meant for that purpose, it was just made for publicity. Without the mooring mast, the building might not have become so popular. Al Smith went all out to make that building what it is today, and it's still standing in New York City today.

#### ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

#### REWRITE

The electoral college is real biased 'cause the presidential candidates or a party's central committee can pick the electors, which might make 'em vote not according to the majority vote. What's most worrisome is the chance of a tie in the electoral vote. If that happens, the election would go to the House of Representatives, where state delegations vote on the president. Since each state only gets one vote, the single representative from Wyoming has as much say as the 55 representatives from California. Most states have a "winner-take-all" system, which could easily skew the vote and make it swing in the wrong direction, against the voters' popular vote. This makes the electoral college irrational. Lastly, the electoral college just ain't fair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

#### REWRITE

One of the reasons I think that the Electoral College actually works is because it involves picking the electors who vote for President and Vice President, and then congress counts the electoral votes. The Electoral College helps pick the president and vice president, and if we didn't have that, it'd be total chaos, because with the Electoral College it's way easier and faster and a better process. The Electoral College has a lot of electors and electoral votes, which is really important because under the 23rd Amendment of the Constitution, the District of Columbia gets 3 electors and is treated like a state for the Electoral College. So, when we talk about states, it includes the District of Columbia.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

My next reason that you should join the Seagoing Cowboys program is because it helps you be more aware of people in other countries and their needs. Im very grateul that I had the opportunity to participate in this program. It relly opened up the world to me. I learned that people in other countries need help during times of war. My final reason that you should join this program is because you will learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three time a day. I also had to pull up bales of hay and bags of oats from the lower holds of the ship. It may sound miserable bit it kept me very busy during those long days at sea.

#### REWRITE

My next reason ya should join the Seagoing Cowboys program is because it helps ya be more aware of folks in other countries and their needs. I'm real grateful that I had the opportunity to be part of this program. It really opened up the world to me. I learned that folks in other countries need help during times of war. My last reason ya should join this program is because you'll learn the true meaning of hard work. I had to clean animal stalls and feed and water all the animals two or three times a day. I also had to haul up bales of hay and bags of oats from the lower holds of the ship. It might sound miserable but it kept me real busy during those long days at sea.

#### ANCHOR

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, Chinas population has to.

#### REWRITE

Them cars are causing a whole lot of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-heavy areas in the United States. That greenhouse gas is slowly wearin' away at Earth's ozone layer and if the ozone layer went away, human life itself might start goin' with it. So it'd probably be smart to limit car usage all over the continents and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so future generations have a stable environment to live in, instead of having to wear some sorta gas mask or filter on their face to breathe, like folks in Beijing, China gotta do.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

#### REWRITE

Every one of the earlier missions was unmanned, and that was for a good reason, since no spacecraft could last more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of it is carbon dioxide. What's even more challenging is the clouds that have highly corrosive sulfuric acid, which are also in the atmosphere. The temperature alone would kill a person right on contact. It's 800 degrees Fahrenheit, and the atmospheric pressure is 90 times what we've ever experienced on our planet. So even though Venus is a pretty interesting planet, it can be a dangerous one too because of the misleading name, being called Earth's twin, and the atmosphere being outrageously different than ours here on Earth.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

#### REWRITE

If someone's in the driverless car, and it crashes, the manufacturers oughta be the ones to blame unless they come up with a way for folks to take full control if needed. You could argue the manufacturer didn't get the programming right and that's why somebody got hurt or even killed. This could end up with big companies having to pay millions or even billions in lawsuits. Driverless cars might cause more accidents 'cause there ain't someone actually keeping an eye on the surroundings, and even simple tech like calculators can mess up sometimes, so would you really trust a computer-run car with your life?

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

#### REWRITE

My last point'd be that computers are a big help for businesses. When files are lost or misplaced, the workers can use the computer and pull up the back-up file. When they need to order supplies, most times they'll go to a website and order online. Or when updates are posted about upcoming events in that company, an email's sent out and is found using a computer. Many folks think that people overuse their computers, but that's the user's fault, not ours. We should choose how long we're using computers. Many jobs would be impossible without computers. It's not about overusing them, it's about using 'em right. So overall, I'd say computers are good and very useful when in the right hands.

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

#### REWRITE

When you're in the car, we always wanna make sure we get to where we're goin' without any trouble. Car accidents don't happen all that often to folks, but it's not totally rare either. The features of the driverless car will ensure safety while drivin' all the time. Lots of people still text and drive, which is a big worry on the road for you and for others also drivin'. When you've got a driverless car, you can do what you need to do, and that includes sendin' a text. You'll have less risk of gettin' into an accident. Even though the "non-driving driver" won't have to actually put their hands on the wheel 'cause the car does all the work, the driver still has to stay focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

#### REWRITE

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

#### ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

#### REWRITE

In the story "The Mooring Mast" by Marcia Amidon @CAPS1, the folks buildin' the Empire State Building hit a snag tryin' to set up a dock for dirigibles. One problem they ran into was they didn't have a proper landin' area. Paragraph six mentions it would only let dirigibles anchor there for a few hours. They also figured out most dirigibles from abroad used hydrogen instead of helium, which was way more flammable. In paragraph thirteen, it said an accident could've been worse if it happened over a crowded spot like downtown New York.

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

#### REWRITE

I'd be against the development of these cars, just 'cause if ya got no control over the cah, it could crash more likely than a cah a person is drivin', 'cause what happens if a cah's about to have an accident and you got no control to turn it so it won't crash. I think it'd be bettah if we folks took control of drivin' and not some system put in the vehicle that controls it. We may've had Google cahs that could drive on their own undah specific conditions since '09, with 'em drivin' more than half a million miles without crashin', but at the same time, the Google cah is truly drivahless 'cause it'll still have to alert the drivah to take over if somethin' goes wrong.

#### ANCHOR

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

#### REWRITE

Saeng's been through a tough loss in the family and had to pack up and move to a whole new place. This bit's all about starting fresh and turning the page. The "snows melting" and "hibiscus bidding" are both talkin' about new beginnings. Saeng's gonna look at life with fresh eyes and take her situation for what it is, making the most of it. The author also says "the winter hibiscus was in the ground now," which matches up with Saeng's new outlook on life planted firm. Just like the flower, a seed of hope's been sown in Saeng, and she's ready to bloom.

#### ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

#### REWRITE

The electoral college is wicked biased because the presidential candidates or a party's central committee can pick the electors, which might make 'em vote not accord'n to the majority vote. What's really worryin' is the chance of a tie in the electoral vote. If that happens, the election would get tossed to the House of Representatives, where state delegations vote on the president. Since each state only gets one vote, the lone rep from Wyoming would have as much say as the 55 reps from California. Most states have a "winner-takes-all" system, which could easily mess up the vote and swing it the wrong way, going against the voters' popular vote. This makes the electoral college irrational. And lastly, the electoral college is just plain unfair.

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor a the Empire State building. One reason being a law against airships flying to low over urban areas. Architects went through many obstacles in building masts.

#### REWRITE

Lot of obstacles were tackled tryin' to get the Empire State Buildin' to let dirigibles dock there. It was a long, tough, and well-thought-out process. Workahs couldn't just drop a moorin' mast right on the buildin's roof. A thousand-foot dirigible was moored at the top, held by a single cable tethah, which stressed the buildin's frame. The architects also had to put together a shiny glass and chrome-nickel stainless steel tower that'd light up from inside, with a stepped-back design echoing the buildin's shape. Later, they realized dirigibles couldn't moor at the Empire State Buildin'. One reason bein' a law against airships flyin' too low over urban areas. Architects faced many obstacles buildin' masts.

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

#### REWRITE

One of the reasons I think the Electoral College actually works is 'cause the Electoral College process involves picking the electors who vote for President and Vice President, and then Congress counts the electoral votes. The Electoral College helps choose the president and vice president, and without it, there'd be total chaos 'cause with the Electoral College, it's way easier and faster and a better process. The Electoral College has a bunch of electors and electoral votes, and this is wicked important 'cause under the 23rd Amendment of the Constitution, D.C. gets 3 electors and is treated like a state for the Electoral College. So, in the discussion, when we say "state," we also mean D.C.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

#### ANCHOR

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

#### REWRITE

Cahs are wicked bad for a lotta pollution on this planet. Those cars are causin' about twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some places in the US where they really like drivin' all the time. Greenhouse gases are slowly messin' with the Earth's ozone layah, and if that goes away, we're in big trouble, probably losing human life itself. So it might be wicked smaht to cut back on car usage everywhere, especially in big industrial areas, so we can try to stop wrecking the ozone. Or at least slow it down so future generations have an okay place to live and ain't gotta walk around with a gas mask or somethin' to breathe, like they do in Beijing, China.

#### ANCHOR

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

#### REWRITE

Each of the previous missions were unmanned, and that was for a good reason, seein' as no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of it. What's even more tricky is the cloud that's got highly corrosive sulfuric acid, also floatin' around up there. The temperature alone would kill a person right on contact. It's 800 degrees Fahrenheit, and the atmospheric pressure is 90 times more than what we've ever seen on our planet. So even though Venus is a pretty neat planet, it's a dangerous one too cuz of the misleading name, it bein' called Earth's twin, and the atmosphere bein' wicked different than ours here on Earth.

I think the mood that is created by the author in this memoir is cheerful and welcoming. In paragraph @NUM1 he says, "My parents always kept their arms and the door opened to the many people we considered family, knowing that they would do the same for us." The author is explaining how their house was always open to anyone that ever needed, all wanted to come, which is a very welcoming feeling. In paragraph @NUM2 he says, "I will always be grateful to my parents for their love and sacrifice." The movie is creating when he is saying this is very cheerful because he is very happy and grateful for what his parents did for him, and by him showing that it makes the mood cheerful.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

#### REWRITE

The only reason we're given for this is that "Astronomers are fascinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this matters to our lives today. What do we get from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone, there's still some uneasiness since it's not certain or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus all that clearly. The lack of pros and benefits to our planet adding up to the cons and uncertainty that came from reading this article.

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

#### REWRITE

If someone's takin' a ride in a driverless cah, and it crashes, the manufacturahs should be the ones to blame unless they cook up a technology to let humans take full control if needed. Plenty of arguments could be made that the manufacturah didn't program the cah right, and that's why the person got hurt or even killed. This could end up with manufacturahs of big companies payin' millions, maybe even billions, in lawsuits. Driverless cahs could cause a lot more accidents 'cause there ain't someone physically watchin' the surroundings of the cah, and technology, as simple as a calculatah, can malfunction sometimes. So, would ya really trust a cah run by a computah with your life?

#### ANCHOR

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

#### REWRITE

In the memoir "Narciso Rodriguez", the mood created by the author was lovin', carin', and appreciative. Lovin' is what they did most 'cause they basically called everyone their family. For example in paragraph @NUM1 it says that "My parents always kept their arms and their door open to the many people we call family, knowin' that they would do the same for us". Another mood was carin', 'cause they wanted their children to have a bettah life. An example is "My mothah and fathah had to come to this country with such courage, to give their children a bettah life, leavin' their friends, families, and careah in the country they loved". This shows they care about their kids. One last mood is appreciative.

#### ANCHOR

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

#### REWRITE

My last point would be that computahs are a wicked big help for businesses. When files are lost or misplaced, the workah(s) can use the computah and bring up the back-up file. When they need to ordah supplies, most times they'll go to a website and ordah online. Or when updates are posted about upcoming events in that company, an e-mail is sent out and is found using a computah. Many people think that folks ovahuse their computahs, but that's the usahs fault, not ours. We should choose how long we're using the computahs. Many jobs would be impossible without computahs. It's not about ovahusing them, it's about. So, overall, I say computahs are good and wicked useful when used in the right hands.

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

### REWRITE

Dear local Newspaper, From what I've gathered, computers have a negative impact on folks of all ages. I reckon spending the entire day on a computer might lead you to miss out on outdoor activities. Plus, if you sit in a chair all day, honestly, what do you think'll happen? You'll become less active. From my own experience, I've learned that getting into computer games can become quite addictive. Computers have negative effects on people of all ages, and I believe we should pause and reflect on our actions. More than likely, if you're on the computer all day, you'll miss out on activities like sports.

#### ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that they did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen instead of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

#### REWRITE

In the story "The Mooring Mast" by Marcia Amidon @CAPS1, the folks building the Empire State Building ran into a snag trying to set up a dock for zeppelins. One issue they had was not having a proper landing spot. In paragraph six, it mentioned that they could only let zeppelins anchor there for a few hours. Plus, they figured out that most airships from other countries used hydrogen instead of helium, which was way more flammable. In paragraph thirteen, it said an accident could've been worse if it happened over a crowded place like downtown New York.

#### ANCHOR

I would be against the development of theses cars, just for the fact if you have no control over the car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no control to turn the car so it won't crash as well. I feel it would be better if we people took control of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

#### REWRITE

I'd be against developing these cars, because if you can't control the car, it's more likely to crash than a car someone is driving. What if the car's about to get into an accident and you can't steer it away? I think it's better if we humans take control of driving, not some system in the vehicle. We've had Google cars that can drive on their own under certain conditions since 2009, and they can go over half a million miles without crashing, but at the same time, the Google car isn't truly driverless because it'll still need to alert the driver to take over if something goes wrong.

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

#### REWRITE

The mood the author sets in the memoir is real nice and calm. It describes how the family welcomes folks into their home with open arms and an open door, and that makes me, and maybe others, feel like the mood is nice. The mood is calm 'cause it talks about this family doing nice things and there ain't no yelling, no fighting, and I find that to be nice and calm.

#### ANCHOR

Taking care of animals and traveling was not all Luke did on the boat, the cowboys played lots of games. Some of the games they played was baseball and volleyball games in the empty holds where animals lived. They also did table-tennis tournaments, fencing, boxing, reading, whittling and other games to pass time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke it opened up the world to him. Luke had a lot of fun seeing different sites, meeting new people, playing fun games and caring for people in a different, and better way.

#### REWRITE

Looking after animals and traveling wasn't all Luke did on the boat; the cowboys played lots of games. Some of the games they played were baseball and volleyball in the empty holds where animals stayed. They also had table tennis tournaments, fencing, boxing, reading, whittling, and other games to pass the time. Luke said that "being a Seagoing Cowboy was much more than an adventure." For Luke, it opened up the world to him. Luke had a lot of fun seeing different sights, meeting new folks, playing fun games, and caring for people in a different, and better way.

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

#### ANCHOR

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or filter over their face to breathe, like Beijing, China's population has to.

#### REWRITE

Cars are causing a lot of pollution around here. Passenger vehicles are behind twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-heavy areas in the United States. These gases are slowly tearing away at Earth's ozone layer, and if the ozone layer disappears, human life will soon start to vanish too. So it'd probably be wise to cut back on car use across every continent and in major industrial areas to help prevent the ozone's destruction. At the very least, slow it down so future generations have a stable environment to live in, instead of having to wear some kind of gas mask or filter over their face to breathe, like folks in Beijing, China have to.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degree Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

#### REWRITE

All the past missions were unmanned, and that was for a good reason, since no spacecraft could make it more than a few hours there. Most of the atmosphere is carbon dioxide, nearly 97 percent of it. Even tougher is the cloud containing highly corrosive sulfuric acid, also up in the atmosphere. The temperature alone would kill a person on contact. It's 800 degrees Fahrenheit, and the atmospheric pressure is 90 times greater than anything we've ever felt on our planet. So even though Venus is a pretty neat planet, it can be a dangerous one too because of the misleading name, being called Earth's twin, and the atmosphere being outrageously different from ours here on Earth.

But it shouldn't get to the point where people can just remove books from the shelf at their own free will. Without some limit on censorship in a library, absolutely anything could be found there. When we think of a library we don't think of things that are offensive. People view the library as a positive place, created for people's own personal enjoyment. That doesn't mean that we will never find something that @DATE2 offend us in some way there, but people should not be able to just remove books from the shelf because they don't agree with their morals. @CAPS2 is different, and nobody has the right to tell them what exactly is right or wrong, up to a certain point.

#### REWRITE

But it shouldn't get to where folks can just take books off the shelf whenever they want. Without some limit on censorship in a library, absolutely anything could end up there. When we think of a library, we don't think of stuff that's offensive. People see the library as a good place, made for folks' own personal enjoyment. That doesn't mean we'll never find something that might offend us in some way there, but folks shouldn't be able to just pull books off the shelf 'cause they don't agree with their morals. Everybody's different, and nobody's got the right to tell them exactly what's right or wrong, up to a certain point.

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

#### REWRITE

If someone is riding in the driverless car, and the car crashes, the manufacturers should be the ones to blame unless they develop a technology to enable the humans to take complete control if necessary. Many arguments could be made that the manufacturer didn't program the car correctly and that is why the person was injured or even so much as killed. This could result in manufacturers of big companies paying millions maybe even billions of dollars in law suits. Driverless cars could cause a lot more accidents because there isn't someone physically watching the surroundings of the car, and technology as simple as calculators can malfunction sometimes, so would you really trust a car run by a computer with your life?

#### ANCHOR

My last point would be that computers are a huge help for buisnesses. When files are lost or misplaced, the worker(s) can use the computer and bring up the back-up file. When they need to order supplies, most times they will go to a web site and order online. Or when updates are posted about up coming events in that company, an e-mail is sent out and is found using a computer. Many people think that people overuse their computers, but that the users fault not ours. We should choose how long were using one computers. Many jobs would be impossible with out computers. It's not about overusing them its about. So over all I say computers are good and very useful when used in the right hands.

#### REWRITE

My last point'd be that computers are a huge help for businesses. When files get lost or misplaced, the worker(s) can use the computer to pull up the backup file. When they need to order supplies, most times they'll hop online and order off a website. Or when updates are posted 'bout upcoming events in that company, an email's sent out and found using a computer. Many folks think people overuse their computers, but that's the user's fault, not ours. We should choose how long we're using these computers. Many jobs'd be impossible without computers. It's not about overusing them, it's about using them right. So overall, I say computers are good and real useful when in the right hands.

The author concludes with this paragraph to show her determination. When she says, "when the snows melt and the geese return and his hibiscus is budding, then I will take that test again." Saeng is explaining how the geese have the determination to fly back and that the hibiscus has the determination to bud again so why shouldn't she have the determination and confidence to take the test again. Saeng said, "I-I failed the test." It seems as if failing the driving test made her feel like she was going to fail in the new country. But after she saw the geese's and hibiscus's determination through harsh conditions, she was determined to try the test again.

#### REWRITE

The author wraps up with this paragraph to show her determination. When she says, "...when the snows melt and the geese return and his hibiscus is budding, then I will take that test again." Saeng is explaining how the geese have the determination to fly back and the hibiscus has the determination to bud again, so why shouldn't she have the determination and confidence to take the test again. The setting affected the cyclist greatly. He had no water and he was traveling through the high deserts of California in June. The deserts and no water could have been life-or-death to him, making him stressed and thirsty. Couple that with him biking, and you have yourself a dehydrated man in the desert! When he was between the ghost town and bait shop he says, There was no one in sight, not a building, car, or structure of any kind, This would make the cyclist think that there is no hope for his survival if he passed out. The deserts of California affects any cyclist greatly especially one without water like the cyclist in the story.

#### REWRITE

The setting hit the cyclist hard. He didn't have any water while he was riding through the high deserts of California in June. Being in the desert without water could have been life or death for him, making him stressed and thirsty. Add in that he was biking, and you've got a dehydrated guy in the desert! When he was between the ghost town and bait shop, he said, "There was no one in sight, not a building, car, or structure of any kind." This would make the cyclist feel like there's no hope for survival if he passed out. The deserts of California can affect any cyclist a lot, especially one without water like the cyclist in the story.

#### ANCHOR

The mood in the memoir is very adventorous. In the memoir it showed how Narciso's parent's and relatives moved. At first Narciso lived in a furnished one-room apartment, then they could afford to move into a modest three-room apartment that was soon to be Narciso's home. Narciso was born in 1961, in the Ironbound section of Newark, New Jersey. Narciso grew up with his family for a while. "Family" had nothing to do with being a blood relative. Narciso will always be grateful and loving to his parents for what they did for him.

My guess is no because you don't want to deal with that many people about one or two maybe even five books. I'm not saying that people don't get offended by somethings that books and movies say but, your going to have a lot more then just one person come in and say that there are more then just one book or movie. so then there would be no books left. What if you have someone come in and they request that they have a certain movie and you say ' @CAPS4, I'm sorry we had to take that movie off the self because, it offened someone.' I have a feeling that person is not going to be happy and you will have some explaining to do.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

#### ANCHOR

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

#### REWRITE

When you're in the car, we always want to make sure we get to where we're going without any issues. Car accidents don't happen too often to folks, but they're not exactly rare either. The features of a driverless car are gonna make sure you're safe on the road at all times. Lots of people still text and drive, which is a big worry for you and for others on the road. With a driverless car, you can do what you need to do, like sending a text. You'll have less risk of an accident. Even though the "non-driving driver" doesn't have to keep their hands on the wheel because the car takes care of everything, they still need to stay focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.
