ANCHOR

Dear local Newspaper, To my understanding computers have been putting a bad effect on people of all ages. In my opinion staying on the computer all day can cause you to miss out on outdoor activities. Also if you sit on a chair all day, honestly what will happen to you? You will become less active. In past experiences I have learned that if you get interested in computer game it will come very addicting. Computer put negative affects on people of all and I think we should stop and think about what we are doing. Most likely if you stay on the computer all day you will indeed on activities such as sports. @CAPS2 example @PERCENT1 of americans play soccer.

ANCHOR

The book still will be censored to be in that section or not, but we still will have those wonderful books that we all love so much. What if there was a great informative book about how to do a certain task and no one knew how to do it. That book contained bad language, should the health and knowledge of the world go down because of some bad material in a book, that could help us in the near future. Authors have just the same right as we do. They should get a say in wheather @CAPS5 own book is liable to be on the shelves. The government should not get all the say in this series matter in hand. The community and the author that writes it should get more of the say then anyone else.

ANCHOR

People are spending too much time on their computers and are spending less time exercising, enjoying nature, and interacting with family and friends. These people are spending hours and hours in front of a computer getting heavier every day. They start to eat their feelings because of how lonely they are. This process continues until the certain person can barely get out of their chair. Obesity is not the only problem that is damaging their health, their eyes are being damaged also. It is obvious that more & more people are having problems with @CAPS2 eyes everyday. Computers are making this happen. When a certain person is on the computer for only an hour, they are damaging their eyes tremendously.

ANCHOR

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that the did not have suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen insted of helium which was more highly flammable. In paragraph thirteen they said that an accident could have been worse if it had taken place above a densely populated area such as downtown New York.

REWRITE

In the story "The Mooring Mast" by Marcia Amidon @CAPS1 the builders of the Empire State Building faced an obstacle in building a dock for dirigibles. One of the problems they faced was that the did not have nary a suitable landing area. In paragraph six it said that it would only allow dirigibles to anchor there for several hours. Also they had realized that most dirigibles from outside the country used hydrogen insted of helium which was more highly flammable. ANCHOR

No i dont hink that should happen that would be stupid and im sure alot of people will disagree with it. one reason is because adults like all of that stuff. And if they were doing this because kids keep geeting into them. then just get a door that says @NUM1 and older and put cameras up. If kids parents complain then at lest you can say that its all in one room and no kids aloud. this shoudnt be a big deal if your a kid you are going to have to be round all the time when you grow up. So you might as well get used to it. it is a big deal if your cursing all the time but most kids know better and know not to do bad stuff.

ANCHOR

I would be against the development of theses cars, just for the fact if you have no control over ther car the car could crash more likely than a car a person is controlling, because what happens if a car is about to have a car accident and you have no controll to turn the car so it won't crash as well. I feel it would be better if we people took controll of driving and not some system put in the vehicle that controls it. We may have had google cars that could drive independently under specific conditions since 2009, where cars can drive more than a half a million miles without crashing, but at the same time the google car is truly driverless because the car will still have to alert the driver to take over if something goes wrong.

ANCHOR

The author concludes the end; of the story the way he/she did because it shows how much the plant truly means. S'aeng is going to wait till the flower blooms because it means so much to her. The flower represents her and her driving test. When the hibiscus is ready to bloom, she will be ready to drive. The plant gives her hope for a new tomorrow, a new chance. The last paragraph helps the reader realize how much the plant means to the girl, its significance. It makes her feel more at home, and her home makes her feel stranger; makes her joyful and happy after the misery of failing the driving test.

ANCHOR

Saeng has been the victim of a tragic loss in family and also a move to a totally different world. The paragraph is symbolic of turning over a new leaf and starting over. The snows melting and hibiscus bidding are both symbolizing new life. Saeng is going to have a outlook on life and accept her situation to make the best of it. Also, the author say the winter hibiscus was in the ground now as it does compare to saengs new found outlook planted on life. Like the flower, a seed of hope was planted into Saeng, and now she is ready to blossom.

ANCHOR

The builders had many obstacles while building the Empire State building. They had competition with the Chrysler building because of it's height. Al Smith, the constructor of the Empire State wanted to build the tallest and most famous building in the world. He made the buildings seem invincible. He even put a mooring mast on it so things could land on it. But it was never supposed to serve that purpose, It was only created for publicity. Because about the mooring mast the building would have failed to become popular. Al Smith did everything to make that building what it is today and it is still standing in New York city today.

ANCHOR

The electoral college is very biased because the presidential candidates or a party's central committee can choose the electors which may cause them to vote unaccording to the majority vote. The most worrying is the prospect of a tie in the electoral vote. In that case, the election would be thrown to the House of Representatives, where state delegations vote on the president. Because each state only gets one vote, the single representative from Wyoming would have as much say as the 55 representatives from California. Most states have a "winner-take-all" system which could easily throw off the vote and make it swing in the wrong direction and thus, against the voters popular vote. This makes the electoral college irrational. Lastly, the electoral college is just unfair.

REWRITE

Notes: Right licensed by 'very'; no other allowed feature is licensed.

ANCHOR

many obstacles were taken while trying to get the Empire State Building to allow dirigibles to dock there. This was a long, hard and thought out process. Workers couldn't just drop a mooring mast on top of the building's roof. A one thousand-foot dirigible moored at the top of the building. It was being held by a single cable tether, which added stress to the buildings frame. The architects also had to build a shiny glass and chrome-nickel stainless steel tower that would be illuminated from inside, with a stepped-back design that imitated the overall shape of the building. Later on they realized dirigibles could not moor at the Empire State building. One reason being a law against airships flying too low over urban areas. Architects went through many obstacles in building masts.

ANCHOR

One of the reasons i think that the Electoral College actually works is because The Electoral College works is because it process consists of the selection of the electors where they vote for President and Vice President, and the counting of the electoral votes by congress. The Electoral College helps pick the president and vice president and if didnt have that then it wouldve been total chaos because with The Electoral College it is way easier and faster and is a better process , The Electoral College consists of many electors and electoral votes this is really important because under the 23rd Amendment of the Constitution, the District of Columbia is allocated 3 electors and treated like a state for purposes of the Electoral College. For This Reason, in the discussion the word state also refers to the District of Columbia.

ANCHOR

Driverless cars aren't really driverless and may even cause more problems on the road. One negative aspect is that eventually the ability to drive a car would wither away and die. For example, if you took a one year old baby and cooked for and fed him until he was eighteen, would he be able to cook? Even if he watched you cook, he can never cook how you cook because he was never taught the skill. It wasn't needed. So just like that, manual driving can be eradicated for generations to come. Eventually, would anyone know how to drive? Driverless cars are a thing of the future, but are they really better for us? Not necessarily. Although, there are just as many good things as there are bad.

ANCHOR

Automobiles are to blame for a large amount of pollution on this planet. Passenger cars are responsible for twelve percent of greenhouse gas emissions in Europe and up to fifty percent in some car-intensive areas in the United States. Greenhouse gas is slowly chipping away at Earth's ozone layer and if the ozone layer went away human life itself will soon start to go away. So it will probably be smart to limit car usage in every continent and major industrialized areas so we can help stop the destruction of the ozone. Or at the very least slow it down so generations to come have a stable environment to live in rather than wearing some sort of gas mask or philter over their face to breathe, like Beijing, China's population has to.

Each of the previous missions were unmanned, and that was for a good reason, since no spacecraft could survive for more than a few hours there. Most of the atmosphere is carbon dioxide, almost 97 percent of the atmosphere is carbon dioxide. What is even more challenging is the cloud that contain highly corrosive sulfuric acid, which are also located in the atmosphere. The temperature let alone would kill a person right on contact. The temperature is 800 degress Fahrenheit, and the atmospheric presure is 90 times greater than what we have ever experienced on are planet. So although Venus is a pretty cool planet, it can be a dangerous on too because of the misleading name, the planet being considered Earth's twin, and for the atmosphere being outrageingly different than ours here on Earth.

ANCHOR

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

REWRITE

The only reason we are given for this is that "Astronomers are facinated by Venus because it may well once been the most Earth-like planet in our solar system," (TCEV). The author doesn't even clarify how this is impactful to our society today. What is there to gain from a planet that "may well once been the most Earth-like planet in our solar system?" In that sentence alone there is still some uneasiness since it's not sure or confirmed that Venus was once like Earth. Therefore, this is why the author of "The Challenge of Exploring Venus" doesn't support the idea of studying Venus very clearly. The lack of pros and benifits to our planet adding to the pot of cons and uncertainty that was instead made from reading this article.

There have been many weird things in space that we could never figure out. Some of those things are just normal stuff that happens in space and some people don't know that happens. It could've just been a normal thing that happen and everyone thinks it's a big piece of information of aliens. People make hypothesis way to quickly based off of what they've seen and heard. Not all things are true. No one has truly seen an alien before and if there were aliens shouldn't have people already have seen one? Earth has been around for a long time and nobody has seen and alien life form.

In the memoir "Narciso Rodriguez", the mood created by the author was loving, caring, and appreciative. loving is what they did most because they basicly called everyone thier family. For example in paragraph @NUM1 it says that "My parents always kept thier arms and thier door open to the many people we call family, knowing that they would do the same for us". Another mood was caring, because they wanted thier children to have a better life. A example is "My mother and father had to come to this country with such courage, to give thier children a better life, leaving thier friends, families, and career in the country they loved". This shows they care about thier kids. One last mood is appreciative.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on them. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

@CAPS1 and I walked down to the bank and stood there just staring at the water. @CAPS1 then asked if I wanted to hear a joke, and after a pause I said yes. The joke @CAPS1 told me probably should not be repeated but it made me laugh so hard I had trouble breathing. His timing was impeccable and it made my mood right soar. I have always turned to my friends when I felt down. And there have always been there proving I can count on 'em. That day had been a disaster, but the rest of the night turned out to be far better then I had hoped. It is not only the fact that my friends can lift my mood, but it is also important that they make me laugh.

APPLIED FEATURES

appalachian_right_intensifier: "mood soar" → "mood right soar"

appalachian_em: "them" → "'em"

Notes: The right intensifier was licensed by 'made my mood soar.' 'Em was applied with 'them' as object pronoun.

ANCHOR

The features of the setting affect the cyclist greatly. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was not a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

REWRITE

The features of the setting affect the cyclist right much. One feature would be the dryness of the land. He was pedaling for such a long time that he became dehydrated, yet there was nary a drop of water for he did not know how long and he didn't think he could make it that far. Another feature of the setting was the heat. He felt like he could not go on because the heat from the sun made him want to have a heat stroke. Clearly, the features of the setting did greatly impact the cyclist.

APPLIED FEATURES

appalachian_right_intensifier: "greatly" → "right much"

appalachian_nary: "not a drop" → "nary a drop"

Notes: Applied right intensifier and nary due to presence of intensifier and negation. No other features were licensed.

Notes: Only the contraction 'em for 'them' is licensed.

ANCHOR

While one is in the car, we always want to make sure we get to our destination without any problems. Car accidents do not happen very often to people, but it is also not entirely rare. The features of the driverless car will ensure safety while driving at all times. Many people still text and drive, which is a big concern while on the road for you and for others also driving. When you have a driverless car, you can do what you need to do, and that includes sending a text. You will have a less risk of getting into an accident. Although the "non-driving driver" will not have to actually put their hands on the wheel because the car does all the work, the driver still has to be focused on the road.

Another reason is, @CAPS1 I go to the library I expect to get the book that I want to read not what others like. One time I went to the library and I was looking for a romantic book to read and I could not find it. So I went up and asked the lady at the counter and she said they do not have it anymore, and I asked why and she told me a lady found it wrong for children to be reading. In my opinion, maybe that lady did not even like romantic books. They should not just off of what one person believes. The next reason is, the library put the movie or book on the shelf in the first place because they thought people would enjoy it.

We all have had times when some thing happened and you just thought of it as a nuisance. But looking back on the same occurrence you just have to laugh at how silly it was. I recall one of these experiences when I went on a motorcycle camping trip this @DATE1. It was a bright and sunny day when my dad dropped me off at the beginning of the main logging road of the area. I decided to keep my pace slow and steady and just enjoy the beautiful scenery. Later that day I found a picturesque place to camp for a few nights on the river. In the @TIME1, I remembered some spurs off the main road from when I have driven with my brother in these woods and decided to go explore some of them near my camp.

Next time someone asks about driveless cars stop and think for awhile. Do you really want to change the nation so that you don't have to drive? Of course people would, but you have to think about all the cons of it. Do you really want to risk the safety of others or changing the laws you've been accustomed to for so many years? Do people really want the goverment to put all this money into this idea just so they can say its not completely driveless? After all, thats what everyone wants, a driveless car.
